

1 October 2019

Ms. Melanie Clark
Town Clerk
Town of Vienna
Vienna, Virginia 22180

We, the undersigned residents, registered voters and qualified electors in the Town of Vienna, appeal to the Town Council the September 19, 2019 final approval by the Vienna Board of Architectural Review (“BAR”) of the rear architectural designs and plans for the property known as Vienna Market (*aka* Marco Polo), located at 245 Maple Avenue West (BAR19-122). This appeal is being made pursuant to Article 4-12 of the Vienna Town Code. Per Article 4-12, we are including a check for \$125 with this appeal.

The basis of our appeal is that the final architectural designs as approved by the BAR violate the Maple Avenue general design criteria as set forth in Article 4-15(d), and the Maple Avenue Commercial district design criteria as set forth in Article 18-19.14.E.4 and Article 18-95.14.G.1. Attached is a letter dated August 14, 2019 which lays out in more detail the specific reasons for this appeal. By this letter, we also incorporate into this appeal the elevations included in the record for BAR19-122, pdf entitled “Elevations w Edits_PF-21-19-BAR_Vienna Market_Sept2019.pdf (“Final Elevations”).

In brief, the three design criteria cited above require that the rear façades of any buildings on Maple Avenue, and/or any buildings that are being built under the Maple Avenue Commercial district provisions, be consistent with, or the same materials as, the front and side façades, as long as those rear façades are visible from public areas. As approved, the rear façades of four of the five townhouse rows along the proposed Vienna Market Lane consist almost entirely of siding material with no brick; whereas the front and side façades consist almost entirely of brick with no siding. *Compare* Final Elevations at E3 and E3A (front and rear façades of Pleasant); E4 and E4A (front and rear façades of units facing Bank of America); and E5 and E5A (front and rear façades of interior strips 1 and 2).

The specific reasons cited in the August 14 2019 letter and herein meet the “just cause” requirement of Article 4-12. Therefore, under Article 4-12, the Town Council must hold a public hearing within a certain number of days to consider this appeal. We ask that you inform the principal appellants listed below of the time of the public hearing, and that we be granted 20 minutes to present our case.

Respectfully submitted, Charles and Laura Anderson

August 14, 2019

To Paul Layer, Chair, and Members of the Vienna Board of Architectural Review

We hereby submit written comments on **Item No. 4 - Docket No. 21-19-BAR**, *request for approval of a new mixed-use project, at the former Marco Polo restaurant site, Vienna Market, located at 245 Maple Avenue West*. At the outset, we wish to thank the members of BAR for their many hours in working to return the Vienna Market architectural to their originally-intended high level of detail and design integrity. As the first MAC mixed use project, it is vitally important that this project be of the highest quality. We do have one important issue with the proposed elevations; namely, the substandard materials and design for the rear of the townhouses that are oriented perpendicular to Maple and Church Streets (hereinafter “the perpendicular units”).

The 2D elevations appear to show that the rear of the perpendicular units are covered with some form of monochromatic siding, with very little trim, cornice work, or other detailing. The fronts and sides of the perpendicular units, by contrast, are adorned with elaborate brick designs of varying, rich colors, and substantial trim detail. The incongruity of the rear of the perpendicular units is heightened by their proximity to the higher quality materials and greater detailing of the rear of the units facing Maple Avenue. For some inexplicable reason, the plans show that some of those high quality elements found in the front and side façades, including lower level rustication and use of brick, has been carried over to the rear of the Maple Avenue facing units, but has not been applied to the rear of the perpendicular units.

We believe that Vienna Code requires that the rear of the perpendicular units at the least should have the same level of detail and use the same materials as the rear of the units facing Maple. Comparable treatment is required by both the general design criteria as set forth in **Article 4-15(d)**, and the MAC design criteria set forth in **Article 18-95.14.E.4** and **Article 18-95.14.G.1**.

Article 4-15(d) states:

The Board of Architectural Review, and, on appeal, the Town Council, shall use the following standards and criteria in considering applications filed under this chapter:

(d) Whether or not proposed freestanding buildings use the same or architecturally harmonious materials, color, texture and treatment *for all exterior walls*; and in the case of partially freestanding buildings, whether or not the same or architecturally harmonious materials, color, texture and treatment are used *on all portions of all exterior walls exposed to public view*¹.

¹ Emphasis added/

Article 18-95.14.E.4. provides as follows:

Side and rear building façades, *if visible from public streets*, shall have a similar architectural treatment as used on the primary or front façade².

In addition, with respect to materials, Article 18-95.14.G.1. of the MAC states:

Façades of a building *visible from a public street or single-family detached dwelling* shall have consistent material and a similar architectural style³.

This requirement for consistency in material and architectural style is not limited to the primary façade, but applies to any façade that is visible from a public street.

Thus, both the general design provisions for Maple Avenue and the specific provisions for MAC are in agreement: if the rear of a building is visible from a public street or by the public (from a park, say), then the rear must be comparable in materials, color and detailing to the front of the building.

The rear façades of the interior units, as well as the units facing Pleasant Street and the Bank of America, will be visible from Church Street. Church Street is a public street. The 3D elevations clearly show that the rear of those units will be visible to any pedestrian walking along Church Street. In fact, the incongruity of the architectural detailing of the rear of those units with the rear of the units facing Maple Avenue will highlight the substandard level of materials and detailing. The rear of the perpendicular units will also be visible to visitors using the public plaza at the corner of Pleasant Street and Maple Avenue. Moreover, the rear façades will be visible from the undersigned's single-family detached dwelling.

To summarize, there is no question that both the general design provisions of Article 4 and the MAC specific provisions of Article 18-95 require high quality materials and design for any façade that is visible to the public. The current elevations for Vienna Market fall short of this requirement. We ask the BAR to withhold final approval of the elevations and 3D plans until they are brought in conformance with both the general architectural guidelines for Maple Avenue and the MAC.

Sincerely,

Charles and Laura Anderson

Charles and Laura Anderson
125 Pleasant St., NW
Vienna, Virginia

² Emphasis added. Note that, although the MAC does not require the submission of elevations for inward facing facades as part of the rezoning application, the ordinance set forth definitive design standards for all elevations that are visible from public streets. The only way the Town can enforce the MAC standards is through the BAR final design approval process.

³ Emphasis added.
