Subject: Traffic Calming Memorandum  
Beulah Road

### ***Introduction***

This memorandum summarizes the results of the data collected for the Traffic Calming evaluation for the section of Beulah Road from Ayr Hill Avenue to Sideling Court located in the Town of Vienna, Virginia. Data was collected to determine if locations on the section are eligible for traffic calming. Per 'The Citizen's Guide to Traffic Calming in Vienna' prepared by the Vienna Transportation Safety Commission, a roadway must meet these basic requirements to qualify for traffic calming:

- The roadway must be a collector or a local road
- The posted speed limit cannot exceed 25 mph
- The road must be a two-lane road

Once a roadway meets the above basic requirements, the average speed and average daily traffic (ADT) volumes determine if the roadway qualifies for traffic calming measures. The 85<sup>th</sup> percentile speeds must be 31 mph or more and the minimum ADT must be 2,000 vpd. The ADT determines whether physical or non-physical measures are necessary.

This memorandum presents the data necessary to evaluate the preliminary steps of the traffic calming process for the section of Beulah Road from Ayr Hill Avenue to Sideling Court.

### Study Area

The Beulah Road study area is shown in **Figure 1**. It also shows the marked crosswalks, sidewalks, and trails in the study area.

Figure 1: Study Area

The following major observations can be made about the study area:

- Beulah Road is a two-lane free flowing road in the study area. All the side streets are stop-controlled from Ayr Hill Avenue to Sideling Court. The intersections of Beulah Road with Church Street and Maple Avenue are signalized.
- There is only one marked crosswalk to cross Beulah Road in the study area, just south of Creek Crossing Road.
- Handicap ramps exist at two locations on Beulah Road, but without any marked crosswalks.
- Wolftrap Elementary School is located just outside the study area, between John Marshall Drive and Talisman Drive.
- There is a missing link in the sidewalk network on the west side of Beulah Road, between Church Street and Ayr Hill Avenue

### ***Roadway Descriptions***

Following is a description of the existing conditions for the roads within the study area.

Beulah Road is classified as a minor arterial running northwest-southeast according to VDOT and the Town of Vienna Street Classification Map. The posted speed limit is 25 mph in the study section.

Ayr Hill Avenue is classified as a local roadway running southwest-northeast between Park Street and East Street. The posted speed limit is 25 mph in the study area.

Creek Crossing Road is classified as a local roadway running southwest-northeast between Beulah Road and Old Courthouse Road. The posted speed limit is 25 mph in the study area.

Sherwood Drive is classified as a local roadway which starts at Beulah Road and ends in a cul-de-sac.

Nelson Drive is classified as a local roadway which starts at Beulah Road and ends in a cul-de-sac.

Druid Hill Road is classified as a local roadway which starts at Beulah Road and ends in a cul-de-sac.

Broadleaf Drive is classified as a local roadway running southwest-northeast between Beulah Road and Glyndon Street. The posted speed limit is 25 mph in the study area.

Edwin Lane is classified as a local roadway which starts at Beulah Road and ends in a cul-de-sac.

Cynthia Lane is classified as a local roadway which starts at Beulah Road and ends in a cul-de-sac.

MacArthur Avenue is classified as a local roadway running southwest-northeast between Beulah Road and Rockport Road.

John Marshall Drive is classified as a local roadway running southwest-northeast between Beulah Road and Talisman Drive.

Sideling Court is classified as a local roadway which starts at Beulah Road and ends in a cul-de-sac.

### ***Data Collection***

The daily traffic volume data and the speed data was collected using Automatic Traffic Recorders (ATRs) starting from September 17, 2015 to September 28, 2015 at three locations on Beulah Road, as shown on **Figure 2**. Daily traffic counts were also collected for the following roads in the study area:

- Ayr Hill Avenue
- Creek Crossing Road
- Broadleaf Drive
- MacArthur Avenue
- John Marshall Drive

The detailed data collected is included in the Appendix.

Field observations were also made to get the number of pedestrians and bicyclists crossing Beulah Road in the study area in the AM and PM school peak hours, which is shown in **Figure 3**.

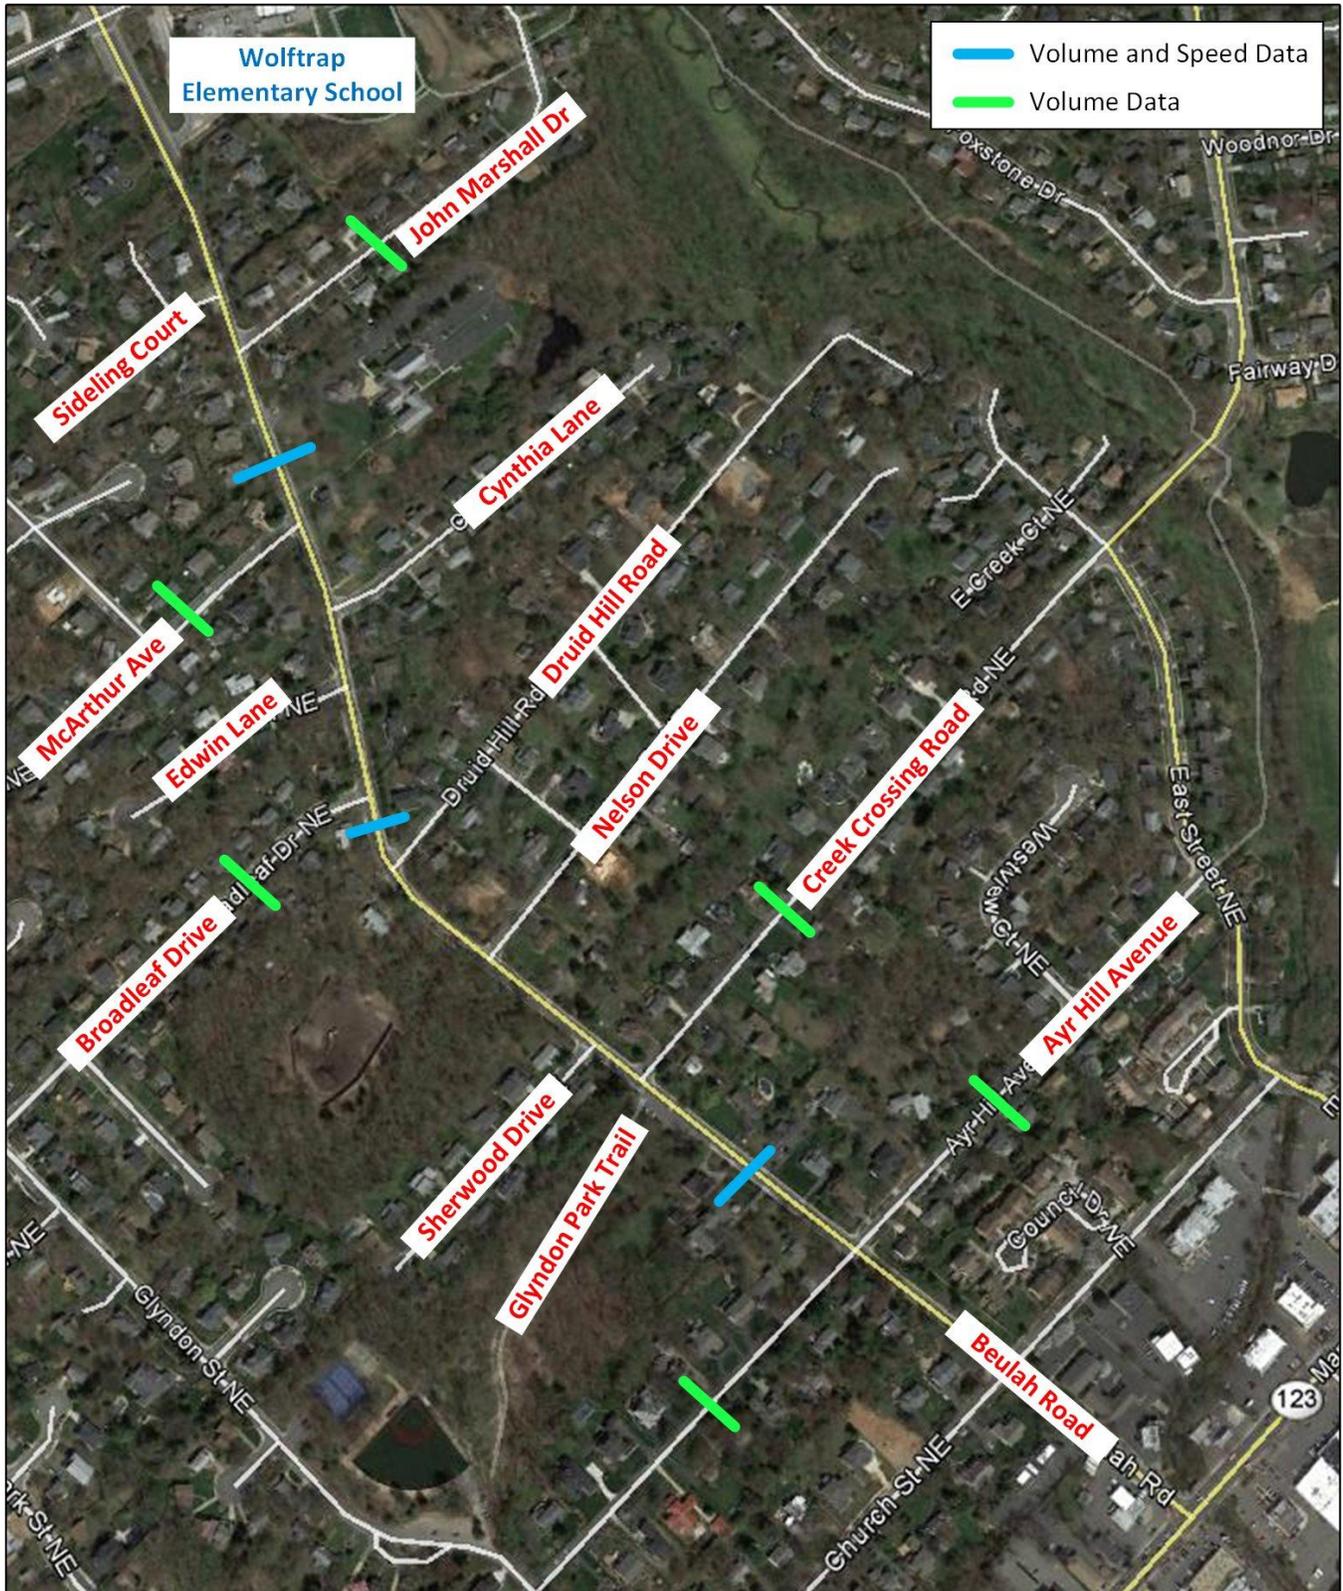

Figure 2: Count Locations

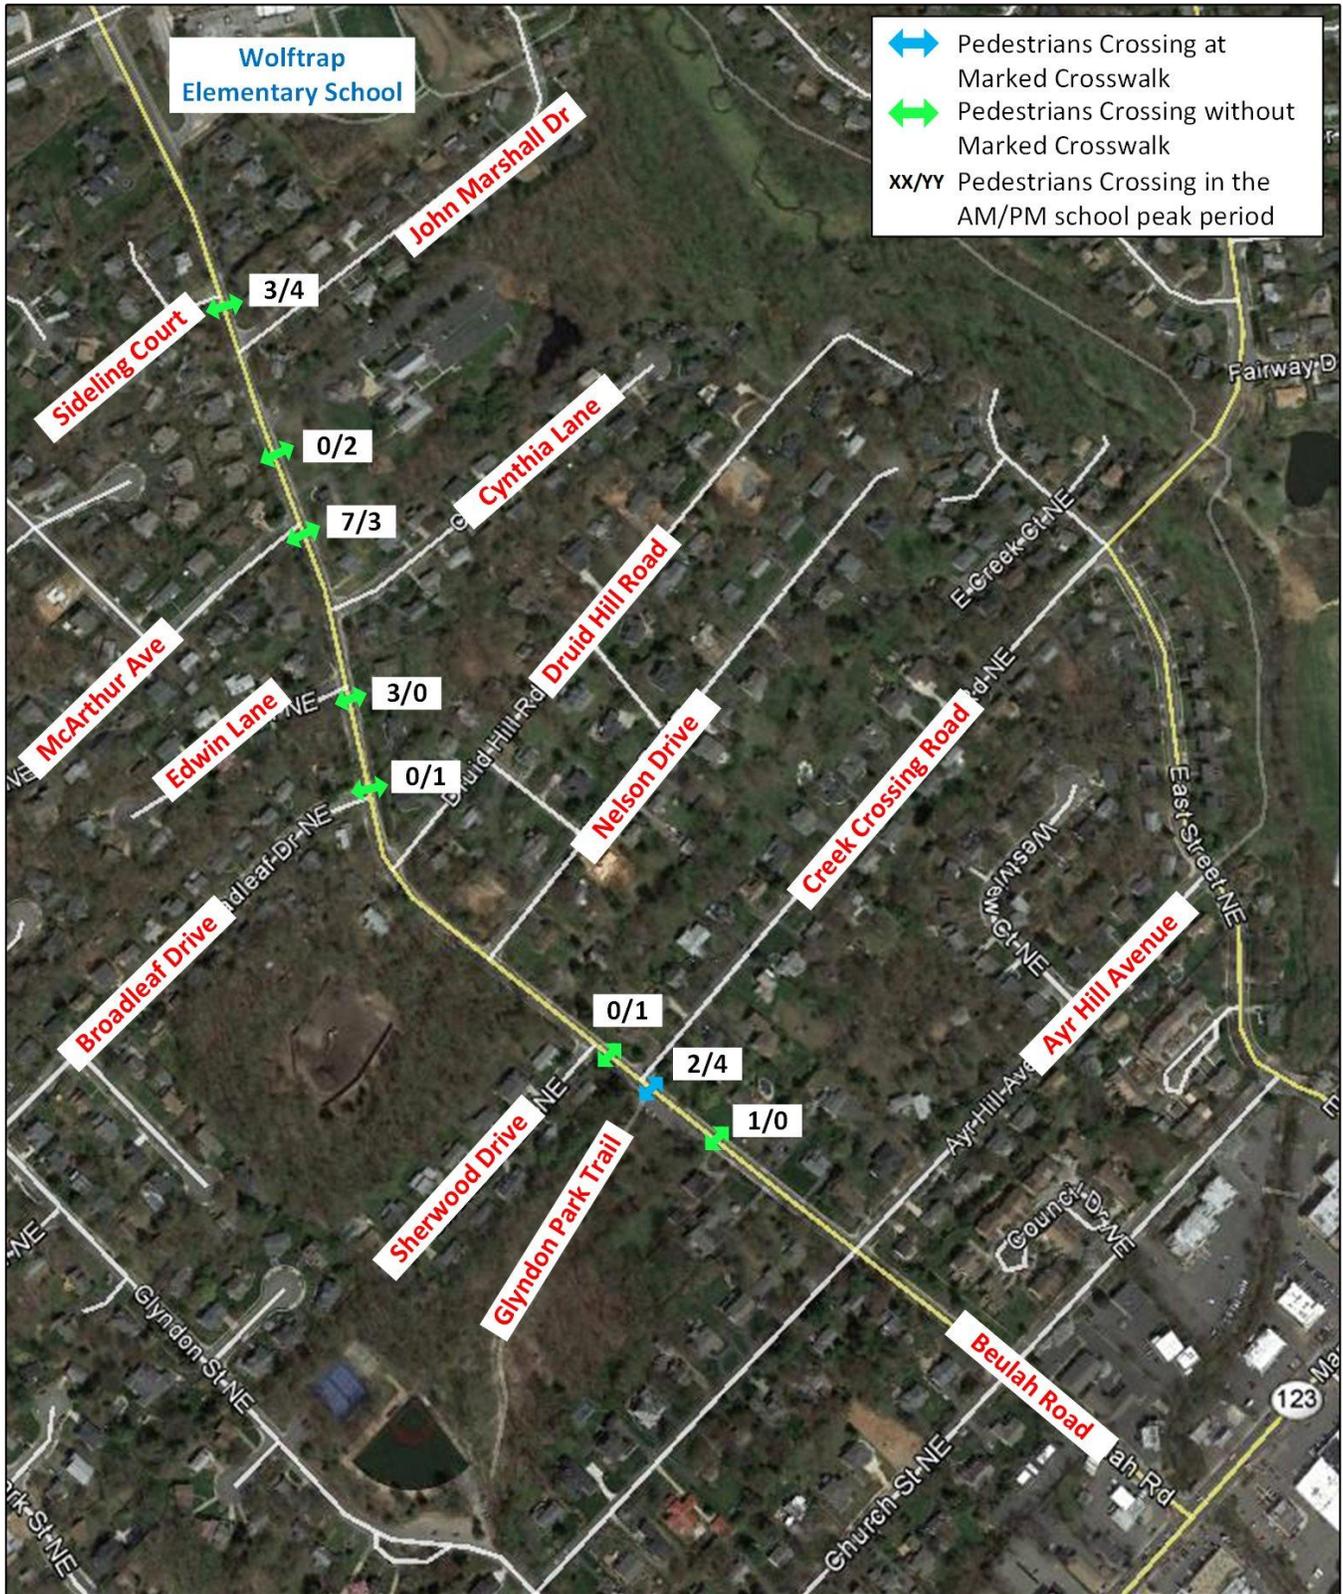

Figure 3: Pedestrian/Bicyclist Counts

## Analysis

### Speed Data

Based on the data collected, average daily trips were determined and speed data was analyzed. A summary of the speed data collected during the count period is shown in **Table 1**.

**Table 1: Summary of Speed Data on Beulah Road**

Roadway Section	Average Daily Traffic (ADT)*	Average Speed**	85th Percentile Speed**	10 MPH Pace Speed**	Highest Recorded Speed**
Between Ayr Hill Ave and Creek Crossing Rd	12,426 VPD	29 mph	33 mph	25 to 34 mph	64 mph
Between Druid Hill Rd and Broadleaf Dr	11,850 VPD	28 mph	31 mph	23 to 32 mph	59 mph
Between MacArthur Ave and John Marshall Dr	11,499 VPD	30 mph	34 mph	25 to 34 mph	68 mph

\* Vehicles per day were averaged for the weekdays from September 17, 2015 to September 28, 2015 (September 23, 2015 was excluded due to the Pope's visit to DC)

\*\* The speeds were calculated from the data collected for the entire period (September 17, 2015 to September 28, 2015).

### Traffic Calming Criteria

The existing roadway conditions and speed data were compiled to determine if the subject roadways qualify for traffic calming measures. The information is summarized in **Table 2**.

**Table 2: Summary of Traffic Calming Criteria for Beulah Road**

Roadway Section	Functional Class	Posted Speed (MPH)	2-Lane Roadway	ADT (VPD)*	85th Percentile Speed**	May Qualify for Traffic Calming
Between Ayr Hill Ave and Creek Crossing Rd	Local Roadway	25 mph	Yes	12,426	33 mph	YES
Between Druid Hill Rd and Broadleaf Dr	Local Roadway	25 mph	Yes	11,850	31 mph	YES
Between MacArthur Ave and John Marshall Dr	Local Roadway	25 mph	Yes	11,499	34 mph	YES

\* Vehicles per day were averaged for the weekdays from September 17, 2015 to September 28, 2015 (September 23, 2015 was excluded due to the Pope's visit to DC)

\*\* The 85<sup>th</sup> percentile speeds were calculated from the data collected for the entire period (September 17, 2015 to September 28, 2015).

The following conclusions can be made from **Table 1** and **Table 2**:

- The average speeds for the three sections on Beulah Road range from 28 mph to 30 mph
- The 85<sup>th</sup> percentile speeds for all three sections are 31 mph or higher
- The ADTs on the three sections range from 11,499 vpd to 12,426 vpd
- Per The Citizen's Guide to Traffic Calming in Vienna prepared by the Vienna Transportation Safety Commission, the segment of Beulah Road in the study area qualifies for traffic calming measures

**All-Way Stop Control**

This section presents the results of the analysis conducted to determine if All-Way Stop Control is warranted at any intersection in the study area. The traffic calming guide lists the following criteria applicable to all-way stop signs:

- The streets must have a maximum ratio of 3:1 of the traffic volume from the main street to the minor street. The total minimum volume entering the intersection from all directions should be 1,000 vpd

**Table 3** shows the summary of the volume data pertinent to the criteria for all-way stop signs.

**Table 3: Summary of All-Way Stop Control Criteria for Beulah Road**

Intersection	Major Street Traffic Volume (vpd)**	Minor Street Traffic Volume (vpd)**	Ratio of Major Street to Minor Street Volume	Traffic Volume Entering the Intersection	May Qualify for All-Way Stop Signs
Beulah Road and Ayr Hill Avenue	12,426	3,347	3.71	14,100	NO
Beulah Road and Creek Crossing Road	12,426	1,764	7.04	13,308	NO
Beulah Road and Sherwood Drive*	12,138	130	93.37	12,203	NO
Beulah Road and Nelson Drive*	12,138	260	46.68	12,268	NO
Beulah Road and Druid Hill Road*	11,850	300	39.50	12,000	NO
Beulah Road and Broadleaf Drive	11,850	549	21.58	12,124	NO
Beulah Road and Edwin Lane*	11,674	100	116.74	11,724	NO
Beulah Road and Cynthia Lane*	11,674	200	58.37	11,774	NO
Beulah Road and MacArthur Avenue	11,499	711	16.17	11,854	NO
Beulah Road and John Marshall Drive	11,499	214	53.73	11,606	NO
Beulah Road and Sideling Court*	11,499	120	95.82	11,559	NO

\* The traffic volumes on the minor street were estimated from the total number of houses on the streets. Each house was assumed to generate 10 vehicle trips per day.

\*\* Vehicles per day were averaged for the weekdays from September 17, 2015 to September 28, 2015 (September 23, 2015 was excluded due to the Pope's visit to DC).

*Please note that the major street volumes for the intersections not directly adjacent to an ATR location were calculated by averaging the volumes from two ATR locations.*

As shown in **Table 3**, the ratios of the major street volume to the minor street volumes for all the intersections exceed the maximum ratio of 3:1. The minimum volume entering the intersections is considerably high, but that is due to the higher volumes on Beulah Road. None of the side streets have volumes that meet the requirement for an all-way stop control at the intersection.

### **Other Observations/Issues**

As mentioned earlier, in addition to collecting the speed and volume data, field visits were made to observe the existing conditions related to the sight distances, the number of pedestrians and bicyclists in the study area. The following are some major observations that might affect the decision for traffic calming measures in the study area:

- Since Wolfrap Elementary School is just outside the study area, a number of students (with and without parents) were observed using the sidewalks along Beulah Road and crossing Beulah Road. Some students were also observed crossing Beulah Road at locations without any marked crosswalks. The highest occurrence was near John Marshall Drive and near MacArthur Avenue.
- There are numerous school bus stops in both directions along Beulah Road.
- It was observed that there might be some sight distance issues for Beulah Road near Druid Hill Road and Broadleaf Drive. Beulah Road curves near Druid Hill Road and it might cause some pedestrian/bicyclist safety issues crossing Beulah Road near the curve. However, actual measurements should be confirmed in the field.
- Some pedestrians were observed crossing Beulah Road at the handicap ramps along Beulah Road. There are no marked crosswalks at the locations where the handicap ramps are provided.
- The highest speed recorded at the three locations on Beulah Road ranges from 59 mph to 68 mph, which is 34 mph to 43 mph above the posted speed limit. This might cause safety issues for the traffic as well as the pedestrians and bicyclists in the area.

### **Traffic Calming Options**

This section lists the following possible options for traffic-calming measures along Beulah Road as per The Citizen's Guide to Traffic Calming in Vienna prepared by the Vienna Transportation Safety Commission:

- Short Term Options:
  - Pedestrian Crossing Bollards
  - Radar Speed Indicators
  - Raised Crosswalks/Speed Humps
- Long Term Options:
  - Traffic circles
  - Chicanes
  - Restrictions on Traffic Flow

### ***Conclusions***

Speed and Volume Data was collected on Beulah Road and other minor streets from Thursday, September 17, 2015 to Monday, September 28, 2015. The study supports the following major conclusions:

- The speed data for three locations on Beulah Road showed that the 85<sup>th</sup> percentile speed at all the locations is 31 mph or higher.
- The ADT on Beulah Road ranges from 11,320 vpd to 12,146 vpd.
- The speed and volume data collected shows that the section of Beulah Road in the study area satisfies the minimum requirements for traffic-calming measures.
- Moreover, a few pedestrians (including students) were observed to be crossing Beulah Road at locations without a marked crosswalk.
- Although Beulah Road qualifies for traffic-calming measures, an all-way stop control is not warranted at any of the study intersections
