

Board of Architectural Review

Council Chambers

Second floor of Town Hall

127 Center Street S

To the Board,

Chef Tan is expanding its successful restaurants from New York and Boston to the Mid-Atlantic with its first location in the region in Vienna. Providing a menu celebrating its Hunan traditions of excellence, Chef Tan is providing a higher end modernized take on these favorites, blending spices and farm fresh ingredients.

The scope of the work proposed to activate this location is modest. **Chef Tan needs to add to outdoor walk-in coolers on the back of the property replacing an existing shed.** The ultimate appearance will be clean and symmetrical from the current exit. The height of the units themselves will be 90” and because it is at the back of the plaza, they are generally not visible to the public or adjacent property due to the heavy tree cover next door.

Thank you for your consideration,

Chef Tan
