Introduction

What is CIP?

The Capital Improvement Plan (CIP) is the Town of Vienna's long-term planning tool for identifying, scheduling, and funding major infrastructure and capital needs. It serves as a roadmap for investing in projects that maintain and improve the Town's essential services, facilities, and quality of life. The CIP outlines anticipated capital expenditures over a multi-year period, while ensuring that projects are both financially feasible and aligned with the Town's strategic priorities.

How the CIP is Funded

The Town of Vienna primarily funds its CIP projects through the issuance of general obligation bonds. These bonds provide the upfront capital needed to undertake large-scale projects. The debt service on these bonds is then repaid over time using a combination of reliable revenue sources:

- Meals Tax Revenue – Dedicated collections from the Town's meals tax are used to repay bond obligations related to general infrastructure and capital improvements.
- Water and Sewer Revenues – User fees collected through the Water and Sewer Fund are applied toward bond repayments for water and sewer system improvements.
- Grants and Other Outside Funding – The Town actively pursues federal, state, and regional grants, along with other external funding sources, to supplement local resources and reduce reliance on tax-supported debt.

Purpose and Value

By using general obligation bonds supported by stable revenue streams, the Town is able to spread the cost of long-term capital investments over time. This approach ensures that today's residents and future generations share equitably in the cost of improvements that provide lasting benefits to the community.

The CIP also plays a critical role in maintaining the Town's fiscal responsibility and financial stability. By planning ahead, carefully matching revenues to expenditures, and responsibly managing debt, the Town preserves its AAA bond rating, the highest rating available. This rating allows Vienna to borrow at the lowest possible interest rates, reducing costs for taxpayers and ensuring more funding is available for community priorities.

Through responsible planning and financing, the CIP enables Vienna to maintain safe, modern, and sustainable infrastructure while protecting the Town's longer-term financial health. The plan is updated regularly to reflect new priorities, evolving community needs, and changing fiscal conditions.

Planning Process

The Capital Improvement Plan (CIP) Process

The development of the CIP is a collaborative and deliberate process that ensures the Town of Vienna's infrastructure and capital priorities are identified, evaluated, and aligned with the Town's financial capacity. The process spans from April through October each year and involves close coordination between Town departments, the Finance Department, the Budget Committee (BCOM), and the Town Council.

- Step 1: Departmental Review (April – May) – Each spring, department heads review and update their capital project lists and submit requests for new or revised projects. These requests include detailed project descriptions, estimated costs, timing, and justifications to ensure that proposed investments align with operational needs and community projects.
- Step 2: Initial Budget Committee Review (July – First Meeting) – In July, the Budget Committee (BCOM) holds its first meeting to review the initial project requests. During this session, BCOM examines the scope of each proposed project, evaluates project descriptions, and reviews preliminary results of the debt service model and financial assumptions.
- Step 3: Final Budget Committee Review (July – Second Meeting) – BCOM reconvenes later in July to refine the CIP. At this meeting, the committee finalizes project requests by bond year, reviews and adjusts debt service model assumptions, considers financial constraints and revenue projections, and prepares a draft CIP for distribution to Town Council in August.
- Step 4: Council Review (August – September) – The draft CIP is provided to Town Council in August. Councilmembers have time to review the proposed projects, the debt service model, and the underlying assumptions in advance of the September 15 Work Session, where projects are discussed by bond year. This session ensures full transparency and provides an opportunity for Council feedback and adjustments before final adoption.
- Step 5: Adoption by Town Council (October) – Following review and discussion, the CIP is formally adopted by Town Council at the October 27 Council meeting. Once adopted, the CIP serves as the Town's roadmap for major capital investments in the coming years.
- Recent Update: Meals Tax Increase – At the August 25, 2025 Town Council meeting, Council voted to permanently increase the meals tax rate from 3% to 4%, effective January 1, 2026. This increase will provide additional dedicated revenue to support the repayment of future bond issuances, strengthening the Town's ability to fund critical projects while maintaining fiscal responsibility.

Assumptions

Debt Service Model

The Town of Vienna's Capital Improvement Plan (CIP) debt service model is built on a framework of guiding inputs, financial constraints, and key assumptions. This transparent approach ensures that capital projects are aligned with the Town's long-term plans while remaining fiscally responsible and sustainable.

Inputs Considered in the CIP Model

The development of the CIP reflects a variety of planning documents and community priorities:

- Citizen Input – Feedback from residents gathered through meetings, surveys, and public engagement.
- Comprehensive Plan – Long-term vision for land use, infrastructure, and community growth.
- Strategic Plan – Town-wide priorities and goals established by Council.
- Parks Master Plan – Guidance on recreational facilities and open space investments.
- Outside Funding – Anticipated grants and regional/state/federal funding opportunities.

Constraints Considered in the CIP Model

The CIP must balance community needs with the Town's financial and operational realities. Constraints include:

- Funding Capacity – Availability of revenues to support debt repayment.
- Debt Capacity – Limits based on the Town's AAA-rated borrowing ability and financial policies.
- Staffing Capacity – Ability of Town staff to manage and deliver projects effectively.
- Operating Capacity – Consideration of ongoing operational and maintenance costs tied to new capital investments.

Assumptions

Debt Service Model

2026 Financial Assumptions

The following assumptions guide the debt service model for the 2026-2042 planning period:

- Meals Tax
 - Meals Tax Rate: 4% (effective January 1, 2026)
 - Base meals tax revenue (FY2025): \$3,800,000
 - Growth rate: 3.75% annually
- Debt Service Cash
 - Beginning balance: \$6,100,000
 - Interest earned on cash deposits: 3% annually
 - Debt Repayment Term: 20 years
 - Interest rates on upcoming bond issuances:
 - 2026 issuance: 4.00%
 - 2028 issuance: 4.25%
 - 2030 issuance: 4.50%
 - 2032-2042 issuance: 4.75%

Upcoming Bond Issuances

The Town anticipates borrowing to fund 2026 projects following the October adoption of the CIP. The bond issuance is planned for the winter of 2025, ensuring that funding is available to begin implementation while taking advantage of favorable interest rates and the Town's AAA rating.

Ongoing Projects

2022-24 Bond Issue: Projects by Category

As of 06-30-2025

	Project Number	Bond Funding	Other Funding	Adjustments	Budget	Total Spent/ Encumbered	Balance

ARPA

Purpose

On March 11, 2021, the U.S. Congress passed the **American Rescue Plan Act (ARPA)**, authorizing “relief funds to support state, local and tribal governments in responding to the impact of COVID-19 and in their efforts to contain COVID-19 on their communities, residents, and businesses” (Interim Final Rule, U.S. Treasury Department, 5/24/2021).

On June 9, 2021 the Town received confirmation from Virginia's Secretary of Finance that Vienna would receive \$17.1 million in ARPA funds distributed by the State, distributed in two equal tranches. The full allocation was received by July 2022.

Of this amount, nearly \$15 million was dedicated to CIP-related projects. The Town has until December 2026 to expend all ARPA funds per federal requirements. The following is the breakdown by Department/Fund Activity:

ARPA Funded CIP Projects

Dept. Supported Project

DPW	Glen Ave Sidewalk - Design & Construction
DPW	Park Street Asphalt Sidewalk replacement
DPW	Maple Avenue and East Street - brick crosswalks
Parks & Rec	Renovation to Nutley Yard Office and Storage Facility
Parks & Rec	Maple Ave Streetscape - fencing around plant beds
Police	Body Worn Cameras
Police	In-Car Video Upgrades
Police	Dispatch Software Upgrade to New World
W & S	Water Main Maintenance and Improvements
W & S	Sanitary Sewer Maintenance and Improvements
STMWTR	100 Block Moore Avenue SE Stormwater Drainage Improvements
STMWTR	Northside Prop Yard Water Quality Improvements - Stormwater
STMWTR	Nutley Street Culvert Replacement - Design & Construction
DPW & STMWTR	Glyndon NE Roadway - Stormwater drainage and Curb & Gutter

Projects Completed in 2025

Dept. Project Name

DPW	Demolition of Beulah Road NE house
DPW	Demolition of building at 301 Center St S (Annex)
DPW	Add 2 Electronic Vehicle Charging Stations at Northside Property Yard
DPW	Robinson Trust Sidewalk Program support
DPW	Brick Crosswalk at Maple Ave & Lawyers Rd
Finance	Bond Contingency, Premium, and Issuance Costs
Information Technology	Server Upgrades and Equipment Replacement
Parks & Rec	Meadow Lane Park Restrooms
Parks & Rec	Merry-Go-Round Replacement at Meadow Lane Park
Parks & Rec	Park System Master Plan
Parks & Rec	Property Acquisition Improvements
Stormwater	Drainage Design on Manvell Rd, Moore Ave, Valley Dr, & Glyndon St SE
Water & Sewer	Fairfax County Sewer - Capital Payment
Water & Sewer	Water Mains & Appurtenances

Future Projects – 2026 to 2042

Proposed Projects for 2026 Bond Year

Department	Project	Bond Funding	Other Funding	Source of Other Funding
PR	Southside Park Ballfields 1 & 2 Refurbishment	2,900,000		
DPW	Asphalt Mill and Overlay	1,900,000	510,000	General Fund
DPW	Maple Avenue & Church St Crosswalk Replacement	-	1,600,000	Maud Robinson Trust
DPW	Concrete Infrastructure Repair	900,000	400,000	General Fund
DPW	Transportation Infrastructure Improvements	750,000		
PR	Caffi Field Improvements	430,000	30,000	VGSL
PR	FY26 Small Lifecycle Program	370,000		
DPW	Town Hall Interior Renovation	300,000		
DPW	Town Hall Bathroom Renovation	200,000		
DPW	NSPY Facilities Maintenance Program	75,000		
Police	In-Car/Body Worn Cameras	72,000

TOWN OF
VIENNA
since 1890

Appendix A – 2026 Project Descriptions

SOUTHSIDE PARK BALL FIELD #1 & #2 REFURBISHMENTS

Department: Parks and Recreation

Activities: Planning/design and construction

Strategic Plan Objective: Environmentally Sustainable and Complete Community

First Year Capital Budget Amount: \$2,900,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

Currently, games often are cancelled due to drainage issues. There is no irrigation system and the lights on Field #1 are over 30 years old. The creek restoration at Southside Park is anticipated to be complete by winter 2026 which aligns with initiating this project in 2026.

The Southside Park Ball Field Improvements Project will reconstruct Fields #1 and #2 and convert the lighting to LED lights for the ball fields and basketball court. The plans include design work (A&E) followed by amending, grinding, laser grading and sodding the infield, wings areas, and home plate from the back stop. The project also includes several other improvements such as installing irrigation to the outfield, replacing the dugouts, installing warning track and foul poles, and improvements to the press box. Improvements would include assembly areas for wheelchair spaces as identified by the American with Disabilities Act (ADA) standards.

ASPHALT MILL & OVERLAY

Department: Public Works

Activities: Construction and maintenance

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$1,900,000

Total Future Capital Budget Requests: \$19,600,000 FY28 - FY42

DESCRIPTION:

The town maintains 65 centerline miles, or 133 twelve-foot-wide lane miles, of asphalt roadway. This project will rehabilitate asphalt roadways based upon the annual pavement condition assessment survey and other factors. The overall weighted average Pavement Condition Index (PCI) of Town roadways was 74 at the beginning of Fiscal Year 2026. The PCI scale is included in Figure 1.

Funding for this annual major maintenance program will enable approximately 3 centerline miles of pavement rehabilitation each year and is necessary to improve the condition of Town roadways and achieve a PCI of 80 over a ten-year period. Without this investment, the conditions of Town roadways will decline, and a larger future investment will be required to reconstruct roadways in poor condition. Rehabilitation extends pavement service life, and methods include mill and overlay, patching, slurry seal, crack sealing, or full depth reconstruction as determined by the condition of each street.

Financing for the project is from a combination of General Fund and future bond issues.

ASPHALT MILL & OVERLAY

PHOTOS:

MAPLE AVE AND CHURCH ST BRICK CROSSWALK REPLACEMENT

Department: Public Works

Activities: Planning/design and construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$1,600,000

Total Future Capital Budget Requests: \$1,400,000 FY38 – 41

DESCRIPTION:

This project will remove the remaining existing brick paver crosswalks on Maple Ave. and Church St. and replace them with asphalt pavement featuring a stamped brick basketweave pattern that mimics the original aesthetic look of traditional brick crosswalks, as seen at the Church and Mill St intersection near the Town Green. Three intersections have been completed and 13 remaining locations still have original brick.

The existing brick paver crosswalks are approximately 25 years old and are damaged or deteriorated. The instability of the brick courses has resulted in poor roadway conditions and hazardous crossing for pedestrians and vehicles due to rutting, asphalt patches, and uneven surfaces. The asphalt pavement will provide a uniform roadway surface for both transportation and maintenance purposes, compared to the existing transition from asphalt to brick surrounded by concrete within each intersection.

The project also includes ADA compliant curb ramps leading to each crossing, mill and overlay of each intersection, and traffic markings. Costs are included to minimize traffic interruptions and accommodate overnight work and daily re-openings of the roadway.

This project will be financed by a generous donation from the Maud Robinson Trust.

CONCRETE INFRASTRUCTURE REPAIR

Department: Public Works

Activities: Maintenance and construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$900,000

Total Future Capital Budget Requests: \$900,000 per bond issuance.

DESCRIPTION:

Town concrete infrastructure includes an inventory of 89 miles of sidewalk plus curb, gutter, ADA ramps, and driveway aprons that must be maintained.

This ongoing program replaces existing concrete infrastructure in the public right-of-away that is in substandard condition or beyond the end of its service life.

Projects may include the following:

- Replacing wheelchair ramps not compliant with current ADA requirements
- Replacing deteriorating curb, gutter, sidewalk, and driveway aprons
- Repair or replacement of storm inlets and retaining walls
- Replacement of existing asphalt sidewalks

TRANSPORTATION INFRASTRUCTURE IMPROVEMENTS

Department: Public Works

Activities: Planning and construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$750,000

Total Future Capital Budget Requests: \$750,000 per bond issuance

DESCRIPTION:

Funds are for minor sidewalk, transportation, or drainage infrastructure improvement projects that are required by Town Code, recommended by public processes, or recommended by staff to promote a safe and efficiently mobile community. These projects are generally not eligible for Virginia Department of Transportation (VDOT) or DEQ SLAF (Stormwater Localized Assistance Fund) grants and may include:

- Construct curb and gutter in front of new single homes where the builder is required to construct sidewalk under the March 11, 2021, ordinance.
- Installation of missing segments of curb, gutter, stormwater infrastructure, or sidewalk along a street to complete or extend the sidewalk network
- Installing traffic calming measures or minor transportation infrastructure improvements

The project will be financed with 2026 and future general obligation bond issues.

CAFFI FIELD IMPROVEMENTS PROJECT

Department: Parks and Recreation

Activities: Planning/design and construction

Strategic Plan Objective: Engaged and Complete Community

First Year Capital Budget Amount: \$430,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

Caffi Fields contains three ball fields, all of which suffer from drainage problems. The outfields are directly adjacent to one another, and stormwater runoff flows toward the infields of Fields 2 and 3, worsening the drainage issues and reducing both the quality of play and the number of playable days. Since most softball activity takes place within the infields, drainage problems there have the greatest impact. Standing water creates unsafe, slippery conditions, forces cancellations of practices and games, and delays maintenance when the infields remain muddy and wet. This project proposes laser leveling of both the outfields and infields to address these issues.

After the water drainage issues are addressed, the Vienna Girls Softball League (VGSL) has requested the installation of chain link fencing parallel to the asphalt trail, between Field 2 and 3 next to Vienna Elementary, to help prevent softballs from leaving the field of play.

VGSL has further requested the Town install fencing around the pitching lanes as they are currently not fenced. They are located between Cherry Street and Caffi Field 1. This improvement will provide safer location for pitchers to practice and warm-up, protecting spectators from stray balls or walking into the pitch lane area. VGSL will pay for the fence installation. The Town will manage the project.

SMALL LIFE CYCLE REPLACEMENT PROGRAM

Department: Parks and Recreation

Activities: Acquisition and maintenance

Strategic Plan Objective: Engaged and Complete Community

First Year Capital Budget Amount: \$370,000

Total Future Capital Budget Requests: \$160,000

DESCRIPTION:

The projects identified under "General Repairs" represent areas of preventative maintenance, replacement of Furniture, Fixtures, and Equipment (FFE), and other essential repairs intended to support the continued operations of the Vienna Community Center, Bowman House, two historic sites, programs, and special events. These projects ensure that facilities remain safe, functional, and welcoming to the public while preserving the integrity of the buildings and amenities.

Given the evolving needs of the community and the facilities, the scope and specifics of these projects may be adjusted as necessary to address emerging priorities or unforeseen circumstances. This flexibility ensures that resources are allocated effectively and that the Department of Parks & Recreation remains responsive to the needs of its users.

Projects	FY26 & FY27	FY28 & FY29	FY32 & FY33

Wheelchair Lift Replacement	-	-	\$25,000
TOTAL	\$370,000	-	\$160,000

SMALL LIFE CYCLE REPLACEMENT PROGRAM

FY26-27 Projects:

- **Electrical Upgrades to the Freeman Store** - \$60,000

Upgrading the electrical panel and rewiring to meet current safety standards and accommodate the building's power needs.

- **Replacement of Hydraulic Loading Dock for the Auditorium Stage** - \$60,000

Replace the aging hydraulic loading dock, to ensure efficient and reliable loading operations, supporting the continued use of the auditorium for performances and events.

- **New Marquee at the Vienna Community Center** - \$40,000

Install a new marquee to replace the deteriorating and unrepairable structure that holds the letters, enhancing visibility and effectiveness in promoting department activities, events, and community information.

- **Bowman Kiln/Wheel** - \$38,000

Replacement of the Bowman House pottery equipment. The two electric kilns, pottery wheels and the accessible wheel are used heavily year-round as part of the pottery program. The useful life of a kiln and wheel is 10 years.

- **VCC Carpet Replacement** - \$35,000

This project proposes replacing the carpeting in the community center. The life expectancy of a commercial grade carpet is typically ten to twelve years. The original carpet was installed in 2017.

- **Replacement of an HVAC Unit and AC Blower at the Freeman Store** - \$30,000

Replacing the aging HVAC unit and AC blower to ensure a comfortable environment for visitors and the preservation of historical exhibits.

- **Replace Stacking Chairs for Rentals, Special Events, & Theater Performances** - \$25,000

Replacing worn stacking chairs and increasing the inventory to support community rentals, events, and performances, ensuring comfort and availability.

- **Replacement of Cleaning Machine** - \$20,000

Replacing the Viper Floor Machine and a smaller walk-behind cleaning machine to maintain the cleanliness and longevity of the two gymnasium floors, reducing long-term maintenance costs.

- **Exterior Maintenance of Two Historical Sites** - \$18,000

Conduct necessary siding repairs, soft washing, and painting to preserve the historic integrity and appearance of the Freeman Store and Little Library Museum.

SMALL LIFE CYCLE REPLACEMENT PROGRAM

- **VCC Building Bollards** - \$15,000

Replace deteriorating bollards and add new ones to protect the building and pedestrian traffic while entering and exiting the community center.

- **Replacement of Gymnastics Equipment** - \$15,000

Replacement of equipment is proposed based on the manufacturer's recommended lifecycle to prevent breakage during use that may affect users or halt the department's ability to offer the program.

- **Replacement of the Town Green Chairs** - \$8,000

Replace worn chairs to maintain quality seating options for programs/events.

- **Outdoor PA System** - \$6,000

Purchase of a new outdoor PA system to replace an ageing system used for implementation of regular and/or emergency communications to staff and the public during special events.

FY32-33 Projects:

- **Community Needs Assessment** - \$45,000

Conducting a comprehensive needs assessment to gather input from users and non-users of parks and recreation services and develop targeted initiatives for future strategic planning. This item is identified in the Parks & Recreation Master Plan as part of the listed Goals, Recommendations, and Strategies.

- **Replace four large trough sinks in the Community Center Restrooms** - \$45,000

Installing new sinks that are easier to maintain, addressing ongoing challenges in keeping the current sinks clean, while also improving functionality and enhancing the overall appearance of the restrooms.

- **Replace Exterior Railing and Steps - Community Center Fire Exit** - \$45,000

Replacing an aging exterior railing and steps to ensure a secure and dependable emergency exit at the Vienna Community Center.

- **Replace Auditorium Wheelchair Lift** - \$25,000

Replacing the existing wheelchair lift at the end of its lifecycle to ensure continued ADA-compliant access to the community center auditorium stage, maintaining the inclusivity of public events and performances.

TOWN HALL INTERIOR RENOVATION

Department: Public Works

Activities: Design and construction

Strategic Plan Objective: Influential and Well-Governed

First Year Capital Budget Amount: \$300,000

Total Future Capital Budget Requests: \$3,000,000

DESCRIPTION:

Town Hall administrative spaces have not been updated since 2012 and there is a deficiency of adequate workspace to accommodate personnel due to growth over the past 13 years and physical constraints with the existing building configuration. The space deficiency can be resolved with an interior renovation that will efficiently re-configure the layout and adequately distribute personnel. The renovation will be ADA compliant and include carpentry, ventilation, electrical, lighting, interior finishes, and furniture for properly functioning spaces.

A feasibility study was completed in 2024 and Town Council approved staff to proceed with the design for a 1st floor renovation with a goal to refresh the quality and functionality of the work environment. This project is separate from the Town Hall Bathroom Improvements project.

The Budget Committee recommends expanding the scope of the project to include \$300,000 in Fiscal Year (FY) 2026 to redesign the other floors within Town Hall. The estimated cost to construct all levels is \$3,000,000, which will be requested in the FY28(\$2,000,000) & FY30(\$1,000,000) bond issuance process.

TOWN HALL BATHROOM RENOVATIONS

Department: Public Works

Activities: Construction

Strategic Plan Objective: Influential and Well-Governed

First Year Capital Budget Amount: \$200,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

Town Hall restrooms spaces are worn, out of date, and are due for an interior renovation to provide a comfortable and welcoming environment for the public and Town employees. This project will replace all of the restroom interior fixtures and finishes. The design was previously completed with ARPA funding and the Town is currently in the permitting stage to enable a 2026 construction start.

NSPY FACILITIES REPAIR PROGRAM

Department: Public Works

Activities: Maintenance

Strategic Plan Objective: Fiscally responsible community

First Year Capital Budget Amount: \$75,000

Total Future Capital Budget Requests: \$2,300,000 FY28 – 42

DESCRIPTION:

Public Works Facilities at the Northside Property Yard are approximately 20 years old. Although the Facilities are well maintained, major building equipment and systems are approaching the end of their service lives. This program forecasts the end of service life for certain systems and their planned replacements to avoid emergency unfunded repairs. The following components are included in this major maintenance program.

- 2026: \$75,000
 - Roof Top HVAC Unit (RTU): Two RTUs failed and were replaced in 2017 and 2018. The third RTU that controls the climate in the office areas is original to the building and is approaching the end of its service life.
- 2028: \$200,000
 - Replace Flat Roofs: The main building at NSPY has three flat roofs that have been repaired over time to prevent leaks; however, the roofs are original to the building and are approaching the end of their service lives.

BODY AND IN-CAR VIDEO SYSTEMS

Department: Police

Activities: Leasing

Strategic Plan Objective: Safe Communities

First Year Capital Budget Amount: \$72,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

Using ARPA funds, the Police department entered into 5-year leases with Axion technology for in-car video and body camera video systems. The leases include rental of all the necessary equipment and cloud storage. This equipment has become critical for law enforcement. The courts and the public now demand quality video of officers' interaction. Both leases were purchased at basically the same time so they will both expire in 2027, and a new funding source will need to be identified.

The Budget Committee recommends future requests be funded through the operating budget.

GLYNDON PARK BATHROOM INTERIOR RENOVATIONS

Department: Parks and Recreation

Activities: Construction

Strategic Plan Objective: Engaged and Complete Community

First Year Capital Budget Amount: \$60,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

The existing restroom was built in 1983. In 2022, the exterior of the facility was improved by a local builder to include a new slate hip roof with a 4' overhang to include recessed lighting, stone veneer and stucco on the walls and a flagstone walkway around the facility. The project includes upgrading the interior of the building by replacing stalls, installing epoxy flooring, and adding additional ADA compliant bathrooms. Improvements to the storage areas are included.

WATERS FIELD IMPROVEMENTS PROJECT

Department: Parks and Recreation

Activities: Planning/design and Construction

Strategic Plan Objective: Engaged and Complete Construction

First Year Capital Budget Amount: \$50,000

Total Future Capital Budget Requests: \$550,000

DESCRIPTION:

The Waters Field Improvements Project includes grading the grounds around the concession stand and press box, as there are drainage issues which cause flooding in the concession stand and storage area of the press box. The estimated cost is \$100,000.

The Project includes improving safety by installing poles and netting around the perimeter of Waters Field to keep balls from exiting the ballfield. Babe Ruth baseball players are routinely hitting foul balls onto Center and Cherry Street potentially damaging vehicles and hitting pedestrians. The addition of collegiate play at Waters Field impacts field usage of Caffi Field 3 as homeruns land in the softball playing area. The estimated cost for this project component is \$500,000.

Due to debt issuance and financing capacities, the Budget Committee recommends funding \$50,000 via the Fiscal Year 2026 bond issuance to add poles and extend netting around home plate to improve safety by reducing the number of foul balls exiting the field. Further improvements are recommended for future outyear bond issuances.

Department: Public Works

Activities: Design and construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$1,000,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

This project will prepare a design to eliminate the existing ditch system and replace it with approximately 530 feet of curb, gutter, drainage pipes and sidewalk along Wilmar PLace NW from Lawyers Road to Center Street N. The storm drainage system must be designed to connect the existing storm drainage pipes from Lawyers to Dominion Road.

Preliminary design began in 2024 using a combination of ARPA and developer escrow funds. Completion of design and construction is proposed to be provided through a NVTA or VDOT grant.

Department: Public Works

Activities: Planning and construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$1,000,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

Church Street and Glyndon Street have a lot of pedestrian activity along a narrow roadway with a mixture of infrastructure that includes either no sidewalk with ditches, asphalt paths, sidewalk on one side of the road, or single redevelopments with new sidewalk that are not connected to the sidewalk network. This project will correct deficiencies and provide approximately 1,800 feet of new curb, gutter, and ADA compliant sidewalk to complete the network on both sides of Church Street NE between Park Street and Glyndon Street and both sides of Glyndon Street from Maple Avenue to Ayr Hill Avenue. This project is shown in blue on the photo below. A separate roadway and drainage project on Glyndon Street from Ayr Hill Avenue to Jean Place is currently under construction and will connect to this project when complete (shown in red on the below photo).

Financing for the project is being requested through NVTA 30 funding. The project is currently in the design stage and construction will begin in 2026.

First Year Capital Budget Amount: \$700,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

This project will replace the existing sidewalk along Nutley St SW from Virginia Center Blvd to Tapawingo Road (approximately 1,220 Feet) with a standard shaded-use path (SUP). The project will provide an 8-foot-wide SUP that will provide adequate space to accommodate the various non-motorized forms of transportation utilized in Town (pedestrian, bike, & etc.). This improvement will be beneficial for pedestrians and cyclists commuting to the Vienna metro station, especially with the addition of the capital bikeshare stations.

The design contract is nearly complete, and the project is funded with I-66 concessionaire funds and NVTA 30% local funds. Construction is anticipated to begin in 2027 after the Nutley Street culvert project is complete.

PHOTOS:

AYR HILL SIDEWALK AND RECONSTRUCTION (LAWYERS RD NW TO DOMINION DR NE)

Department: Public Works

Activities: Planning/design and construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$655,000

Total Future Capital Budget Requests: \$1,350,000

DESCRIPTION:

Ayr Hill Avenue NW from Lawyers Rd to Dominion Dr has a narrow roadway profile with stormwater drainage ditches and aging, narrow sidewalk on one side of the street that is not ADA compliant. Furthermore, the roadway is low lying with steep grading leading to adjacent residential properties and a church, creating additional ADA compliance issues.

This project will correct deficiencies along the 475-foot roadway and replace the existing ditch system with curb, gutter, and stormwater sewer. Additionally, the project will correct ADA compliance deficiencies for existing three-foot-wide sidewalk on the south side of the street. The project will also provide ADA access to the adjacent church (Vienna Assembly of God) and to Center St northbound with a switchback ramp. Currently, there are stairs along the sidewalk on the NW corner of the Ayr Hill Ave and Center St intersection due to the grades.

ADA compliant sidewalk will provide a safe route for pedestrians walking to the businesses on Mill Street and Dominion Road, in addition to providing access to the regional trail and the historic Vienna Train Station.

Financing for the project is being requested through VDOT grant applications that will cover 80% of the cost and NVTA 30 funding will be utilized for the remaining local cost. If the VDOT TA Funds are approved, design may begin in FY 2027.

KINGSLEY ROAD SIDEWALK IMPROVEMENTS (FREDERICK TO DESALE)

Department: Public Works

Activities: Construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$650,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

Kingsley Road is approximately one mile from the Vienna metro station and a pedestrian link to Park Street, elementary schools, and shopping. This project will extend the sidewalk network by connecting to the recently completed Robinson Trust Sidewalk Project and existing sidewalk in the area with approximately 1,000 feet of new sidewalk along Kingsley Rd SW from just past Cottage St to Desale St. Based on coordination with the adjacent residents the project will demolish the existing curb & gutter and install new curb & gutter further into the roadway. This in-turn will reduce the tree and grading impacts on the adjacent properties and save on construction costs as the original design required numerous retaining walls.

The project is being funded with Federal Congestion Mitigation and Air Quality (CMAQ) and NVT A 30 funds. The design contract has been previously awarded and is nearly complete. Construction is anticipated to begin in 2026.

MASHIE DRIVE SE CURB, GUTTER, AND SIDEWALKS (HINE STREET SE TO ECHOLS STREET SE)

Department: Public Works

Activities: Design and construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$600,000

Total Future Capital Budget Requests: \$2,700,000

DESCRIPTION:

This project will eliminate the existing drainage ditches along both sides of the roadway and install approximately 1,900 feet of new curb, gutter, drainage infrastructure, and sidewalk. This project will also include sidewalk improvements along the frontage of 203 and 205 Mashie Dr. to provide a pedestrian connection that extends from Mashie Dr to Maple Ave, which would otherwise be a missing link of sidewalk.

Financing for this project is through anticipated NVTA and VDOT grants. If the VDOT TA funds are approved, then design may begin in FY 2027, and the Town will utilize approved NVTA 30 local funding for the match requirement.

AYR HILL AVE TRAFFIC CALMING AT LAWYERS RD NW

Department: Public Works

Activites: Planning/design and construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$270,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

At the March 4, 2024, Town Council Meeting, Council approved the TSC motion and recommendation to implement traffic calming measures on Ayr Hill Ave. at Lawyers Rd. This project will bump out the curb ramps located at the Ayr Hill Avenue leg of the Ayr Hill Avenue and Lawyers Road intersection. This improvement will add approximately 380 feet of curb, gutter, sidewalk, storm sewer, driveway aprons, and on-street parking lines where applicable. These improvements will provide traffic calming effects by narrowing Ayr Hill Avenue within the area of the intersection. It will also create a safer environment for pedestrians.

The design was funded by ARPA and is nearing completion, and the construction will be funded by NVTA funds.

FINANCING/ SOURCES:

LOCUST ST SW TRAIL IMPROVEMENTS

Department: Public Works

Activities: Design and construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$250,000

Total Future Capital Budget Requests: \$1,025,000

DESCRIPTION:

This project will demolish and reconstruct the existing asphalt trail extending from the Center Street S/Locust St SW intersection to the W&OD Trail (approximately 700 Feet). The project will widen both the trail and existing sidewalk along the school parking lot to 10 feet and re-categorized the path as a standard Shared-Use Path (SUP). In addition, the project will include grading and drainage infrastructure improvements because water ponds over the existing path after rainfall in this low lying area.

The grants have been approved and Town Council approved the design contract in March of 2025. Construction is anticipated to begin in 2027/2028 upon completion of the design.

GLYNDON ST SE AND OWAISSA RD SE ROADWAY IMPROVEMENTS

Department: Public Works

Activities: Design and construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$250,000

Total Future Capital Budget Requests: \$800,000 FY32 – 33

DESCRIPTION:

This project will eliminate the existing roadway ditch section along the East side of Glyndon St SE and the North side of Owaissa Rd SE and install approximately 1,150 feet of roadway infrastructure improvements to include new curb, gutter, storm drain, sidewalk, and ADA compliant curb ramps. This project aims to expand the sidewalk network in the area and alleviate existing drainage issues presented during the Glyndon St SE and Owaissa Rd SE drainage study, which concluded in April 2025.

Financing for the design is anticipated through NVTA funding, and financing for construction is currently proposed as future general obligation bond issues in 2032; however, this is a new project and DPW will explore other transportation and stormwater grant funding opportunities.

MAPLE AVE AND JAMES MADISON DR TRAFFIC SIGNAL JUSTIFICATION STUDY

Department: Public Works

Activities: Planning/design and construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$200,000

Total Future Capital Budget Requests: \$700,000

DESCRIPTION:

This project proposes to reevaluate the existing signal at the intersection (HAWK Signal – High-Intensity Activated Crosswalk). Although it is anticipated to improve when the new traffic signals along Maple Ave are completed, the intersection of Maple Ave. and Nutley St. currently backs-up all the way to James Madison Dr. Additionally, James Madison High School and shopping center traffic causes congestion at this intersection, resulting in substantial cut through traffic in local neighborhoods because buses and cars cannot make a protected left turns. Therefore, DPW would like to explore the potential for a traffic signal at this intersection to improve conditions for the high school, shopping centers, and local neighborhoods.

A Signal Justification Report (SJR) will be first completed to determine if a signal is warranted and which signal design is applicable. If an alternative design is applicable, such as a standard traffic signal, then this design will be completed along with construction.

The SJR study and applicable design is anticipated to cost an additional \$200,000, and if warranted, the estimated construction cost is \$700,000. The project is proposed for NVTA 30% local funding.

FINANCING/ SOURCES:

LAWYERS RD NW AND CHURCH ST NW - RECONFIGURATION

Department: Public Works

Activities: Planning/design and construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$200,000

Total Future Capital Budget Requests: \$400,000

DESCRIPTION:

This project proposes a redesign of the Lawyers Rd NW and Church St NW intersection.

Based on a recommended improvement from the Maple Ave Multimodal Study completed in 2020, DPW plans to complete the reconfiguration of the intersection of Church St NW and Lawyers Rd NW to improve the traffic flow and improve pedestrian safety. The project will reconfigure the existing single intersection into two smaller intersections. The reconfiguration also provides a more familiar intersection style which will help with traffic flow and safety.

The anticipated design cost is approximately \$200,000 and the estimated construction cost is \$400,000 due to complexity of the project/location and Maintenance of Traffic that will be required.

FINANCING/ SOURCES:

STORMWATER LOCAL ASSISTANCE FUND (SLAF) STREAM RESTORATION PROJECTS

Department: Public Works

Activities: Planning/design, and construction

Strategic Plan Objective: Environmentally sustainable community

First Year Capital Budget Amount: \$3,800,000

Total Future Capital Budget Requests: \$8,000,000 FY28 – 36

DESCRIPTION:

The Town of Vienna’s stream restoration program currently includes both approved and planned projects to stabilize the steep and eroded stream banks along Bear Branch and Hunters Branch. The projects will reduce sedimentation and provide water quality benefits from reduced sediment transport and enhance aquatic and riparian habitats using natural channel design techniques. Additionally, projects also protect any adjacent property owners from erosion and instability of the stream banks. This program is part of a broader regional effort to support watershed health and comply with state Municipal Separate Storm Sewer System (MS4) permit requirements.

The Town of Vienna’s stream restoration program is funded by anticipated DEQ Stormwater Local Assistance Fund (SLAF) Grants and if approved, a 50% match from Fairfax County Stormwater Tax revenue.

The following projects are included in this program, and a map of each project is provided below:

Project	Status	Stream Restoration	Planned Fiscal Year	Budget (\$M)
Bear Branch Phase 1	In Construction	1,900 feet	FY24-25	\$2,000
Bear Branch Phase 2	In Design	2,300 feet	FY26-27	\$2,100
Hunters Branch Phase 2	In Design	1,800 feet	FY26-27	\$1,700
Bear Branch at Onondio Circle (new)	Riparian Study, Planned Grant Application	750 feet	FY28-29	\$1,600

SERVICE ORGANIZATION DISPLAY BOARDS

Department: Parks and Recreation

Activities: Planning and construction

Strategic Plan Objective: Engaged and Complete Community

First Year Capital Budget Amount: \$50,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

The Town has two service organization display boards at the entrances to Town. One at the Nutley Road/Marshall Road entrance and one at the Maple Avenue (from Tyson's) entrance to Town. The display boards are made of wood and are showing their age. Service organizations apply to the Town to have their logo mounted on the display boards. The Town recognizes that service organizations can be key contributors to a community's social and civic vitality and key providers of public services.

STORMWATER DRAINAGE IMPROVEMENTS: CENTER ST. NORTH TO MILL ST.

Department: Public Works

Activities: Design and Construction

Strategic Plan Objective: Safe and Environmentally Sustainable Community

First Year Capital Budget Amount: \$50,000

Total Future Capital Budget Requests: \$1,000,000 Bond Year 2034

DESCRIPTION:

In 2015, The Town completed a drainage study due to occasional flooding that occurred during significant storm events near the following buildings:

- Condo Building and parking lot at NW corner of Center St. and Maple Ave.
- Freeman House at Mill Street and Church Street
- Cube Smart Self Storage at Mill St. and Ayr Hill Ave.

This project increases the capacity of the stormwater drainage system serving from near the intersection of N Center St. and Maple Ave. to the Northwestern end of Mill St. to better convey 10-yr storm flows and reduce the risk or severity of future flooding events:

- System 1: upgrade 550 feet of 70" pipe to a larger capacity system
- System 2: upgrade 400 feet of 96"x72" box culvert to a larger capacity system

Various recommendations for the proposed improvements were provided for the three areas of concern. The first step will be to update the study calculations and budget cost estimates that were originally completed in 2015 to inform construction costs to be included in the future CIP.

Financing for the project is from a combination of General Fund and future bond issues.

Appendix B – 2028 Project Descriptions

AQUATICS & FITNESS CENTER

Department: Parks and Recreation

Activities: Planning/design and construction

Strategic Plan Objective: Environmentally Sustainable and Complete Community

First Year Capital Budget Amount: \$7,500,000

Total Future Capital Budget Requests: \$20,500,000

DESCRIPTION:

In 2023, the Town sought feedback from residents, exploring the opportunity to construct a recreational aquatics and fitness center at 301 Center St. S. The result was conceptual designs for the project, including a state-of-the-art facility encompassing approximately 24,500 square feet with ample parking for visitors.

The proposed aquatics portion of the center spans approximately 12,000 square feet, featuring a pool specifically designed for recreation and leisure activities. The pool includes four lap lanes for those who enjoy a structured swim, as well as a zero-entry point for enhanced accessibility. Surrounding the pool is ample decking space, ideal for relaxation and socializing. Additionally, there is a standalone slide with its own splash zone, strategically separated from the main pool to maximize usage and fun.

The fitness section of the building covers approximately 9,000 square feet and is designed to support a variety of exercise routines. This area is divided into distinct sections for weights and machines, cardio workouts, and group exercise classes. Whether a person wants to lift weights, run on a treadmill, or participate in a group fitness session, the proposed facility is equipped to meet fitness goals for a variety of interests and needs.

Navy Federal Credit Union has offered the Town an interest free loan of \$3 million for design activities to be reimbursed after 5 years. This will be captured as a lump sum payment via the FY30 bond issuance.

PROPERTY ACQUISITION

125 CHURCH ST NE & 200 DOMINION RD NE

Department: Economic Development

Activities: Acquisition, planning/design, and construction

Strategic Plan Objective: Economically prosperous, Engaged community, and Complete community

First Year Capital Budget Amount: \$5,000,000

Total Future Capital Budget Requests: \$2,900,000

DESCRIPTION:

The Town of Vienna, located at the heart of the 45-mile Washington and Old Dominion Regional Park (W&OD Trail), offers a unique opportunity to attract the trail's 3 million annual users to stop, shop, and dine in Vienna. On April 25, the Town of Vienna and NOVA Parks announced a partnership to explore opportunities to draw more trail users to the town through the development of a W&OD Trail Visitor Center, positioning Vienna as a central hub along the nationally known trail.

The W&OD Trail Visitor Center is envisioned to create a sense of identity for the regional trail, provide services for trail users, and highlight the trail's rich and inspiring history. The proposed project supports one of NOVA Parks' Strategic Plan's signature initiatives, offering a space where visitors can meet, learn, and explore.

As part of the project, the Town and NOVA Parks are evaluating the potential use of two properties adjacent to the trail: 125 Church Street, a vacant office building, and 200 Dominion Road, a historic bank building currently housing an interior design business. The vision for the visitor center seeks to integrate the trail into the surrounding historic and commercial districts and establish separate pedestrian and cycling lanes along Vienna's portion of the W&OD Trail.

The partnership between the Town of Vienna and NOVA Parks aims to create an inviting destination for visitors, stimulate local economic activity, and transform the core of Vienna, extending from the Town Green through the Dominion Road industrial corridor and the Historic Church Street business district. Federal funding, including \$1 million secured in FY24, is supporting the property acquisition of these two buildings.

125 Church Street is currently a vacant and blighted office building abutting the W&OD trail adjacent to the Town Green, and 200 Dominion is a (unofficially) historic old bank building. Both are owned by McLean properties. The Option Agreement to purchase the properties was signed and submitted by Town of Vienna and NOVA Parks to McLean Properties on April 23, 2025.

TOWN HALL INTERIOR RENOVATION

Department: Public Works

Activities: Design and construction

Strategic Plan Objective: Influential and Well-Governed

First Year Capital Budget Amount: \$3,200,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

Town Hall administrative spaces have not been updated since 2012 and there is a deficiency of adequate workspace to accommodate personnel due to growth over the past 13 years and physical constraints with the existing building configuration. The space deficiency can be resolved with an interior renovation that will efficiently re-configure the layout and adequately distribute personnel. The renovation will be ADA compliant and include carpentry, ventilation, electrical, lighting, interior finishes, and furniture for properly functioning spaces.

A feasibility study was completed in 2024 and Town Council approved staff to proceed with the design for a 1st floor renovation with a goal to refresh the quality and functionality of the work environment. This project is separate from the Town Hall Bathroom Improvements project.

The Budget Committee recommends expanding the scope of the project to include \$300,000 in Fiscal Year (FY) 2026 to redesign the other floors within Town Hall. The estimated cost to construct all levels is \$3,000,000, which will be requested in the FY28 & FY30 bond issuance process.

ASPHALT MILL & OVERLAY

Department: Public Works

Activities: Construction and maintenance

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$2,000,000

Total Future Capital Budget Requests: \$17,600,000 FY30 – 42

DESCRIPTION:

The town maintains 65 centerline miles, or 133 twelve-foot-wide lane miles, of asphalt roadway. This project will rehabilitate asphalt roadways based upon the annual pavement condition assessment survey and other factors. The overall weighted average Pavement Condition Index (PCI) of Town roadways was 74 at the beginning of Fiscal Year 2026. The PCI scale is included in Figure 1.

Funding for this annual major maintenance program will enable approximately 3 centerline miles of pavement rehabilitation each year and is necessary to improve the condition of Town roadways and achieve a PCI of 80 over a ten-year period. Without this investment, the conditions of Town roadways will decline, and a larger future investment will be required to reconstruct roadways in poor condition. Rehabilitation extends pavement service life, and methods include mill and overlay, patching, slurry seal, crack sealing, or full depth reconstruction as determined by the condition of each street.

Financing for the project is from a combination of General Fund and future bond issues.

PROPERTY IMPROVEMENT – 200 DOMINION RD NE BANK BUILDING PHASE 1

Department: Economic Development

Activities: Planning/design and construction

Strategic Plan Objective: Vienna as a complete community: Rehabilitation of a historic bank building in the center of the town for public use.

First Year Capital Budget Amount: \$985,000

Total Future Capital Budget Requests: \$2,900,000

DESCRIPTION:

The first phase of 200 Dominion improvements will bring the building to minimum safety and code standards necessary for continued occupancy and future adaptive reuse. This building has not been reviewed or permitted by Fairfax County or the Town of Vienna since 1995 and requires updates to meet current regulatory requirements. Phase 1 will address critical fire safety, accessibility, and general code compliance. The work will ensure that the building provides a safe environment for tenants, staff, and visitors while preventing further deterioration of the historic structure. These improvements will create a compliant baseline condition that allows for the building's preservation, ability for Town use on the 2nd floor, and positions it for inclusion in the larger W&OD Trail Visitor Center project.

CONCRETE INFRASTRUCTURE REPAIR

Department: Public Works

Activities: Maintenance and construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$900,000

Total Future Capital Budget Requests: \$900,000 per bond issuance.

DESCRIPTION:

Town concrete infrastructure includes an inventory of 89 miles of sidewalk plus curb, gutter, ADA ramps, and driveway aprons that must be maintained.

This ongoing program replaces existing concrete infrastructure in the public right-of-way that is in substandard condition or beyond the end of its service life.

Projects may include the following:

- Replacing wheelchair ramps not compliant with current ADA requirements
- Replacing deteriorating curb, gutter, sidewalk, and driveway aprons
- Repair or replacement of storm inlets and retaining walls
- Replacement of existing asphalt sidewalks

TRANSPORTATION INFRASTRUCTURE IMPROVEMENTS

Department: Public Works

Activities: Planning and construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$750,000

Total Future Capital Budget Requests: \$750,000 per bond issuance

DESCRIPTION:

Funds are for minor sidewalk, transportation, or drainage infrastructure improvement projects that are required by Town Code, recommended by public processes, or recommended by staff to promote a safe and efficiently mobile community. These projects are generally not eligible for Virginia Department of Transportation (VDOT) or DEQ SLAF (Stormwater Localized Assistance Fund) grants and may include:

- Construct curb and gutter in front of new single homes where the builder is required to construct sidewalk under the March 11, 2021 ordinance
- Installation of missing segments of curb, gutter, stormwater infrastructure, or sidewalk along a street to complete or extend the sidewalk network
- Installing traffic calming measures or minor transportation infrastructure improvements

The project will be financed with 2026 and future general obligation bond issues.

NSPY FACILITIES PROGRAM

Department: Public Works

Activities: Maintenance

Strategic Plan Objective: Fiscally responsible community

First Year Capital Budget Amount: \$200,000

Total Future Capital Budget Requests: \$2,100,000 FY40 – 42

DESCRIPTION:

The Northside Property Yard (NSPY) Facility is approximately 20 years old with major building equipment and systems approaching the end of their service lives. The NSPY Facilities Program forecasts the end of service life for certain systems and their planned replacements to avoid emergency unfunded repairs. The following components are included in this major maintenance program.

- 2028: \$200,000
 - Replace Flat Roofs: The main building at NSPY has three flat roofs that have been repaired over time to prevent leaks; however, the roofs are original to the building and are approaching the end of their service lives.

WATERS FIELD TURF REPLACEMENT

Department: Parks and Recreation

Activities: Planning/design and Construction

Strategic Plan Objective: Environmentally sustainable Community

First Year Capital Budget Amount: \$1,500,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

This project would replace the synthetic turf at Waters Field which was previously replaced in Fall 2015. The life expectancy of synthetic turf is ten to twelve years.

Financing for the project is included in the proposed 2028 general obligation bond issue for the Town (25%) and anticipated grants from Fairfax County (65%), Vienna Babe Ruth (5%) and Vienna Youth Inc. (5%).

PHOTOS:

PROPERTY IMPROVEMENT: STREETSCAPE

Department: Economic Development

Activities: Miscellaneous Improvements

Strategic Plan Objective: Safe and economically prosperous community

First Year Capital Budget Amount: \$400,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

This project is part of “place making activities” that help to beautify and promote the Town’s Central Business District. In 2022, funding was allocated to create a wayfinding and streetscape master plan. The master plan will provide recommendations on how to beautify the Town’s physical environment within the major corridors and communicate the Town’s unique brand in the business districts. Wayfinding signage helps to welcome and direct residents, visitors, and event attendees (auto drivers, pedestrians, and bicyclists); and successful streetscape provides attractive and functional environments for individuals to walk, shop, dine, bike, work, and play.

More specifically, the master plan will define the scope, the budget, the funding, and the considerations that may impact wayfinding or streetscape design such as codes and standards. The master plan will also identify the appropriate wayfinding/streetscape zones or locations and the furniture and equipment necessary to acquire or improve to beautify the Town’s physical environment. Estimated cost to acquire experts and create a master plan is between \$100,000 to \$150,000.

The second phase of the project is the procurement, acquisition, and installation of the furniture and infrastructure identified in phase one. Examples and estimates for furniture and equipment that could be acquired include the following:

- Brand Banners on Light Poles for Maple Avenue (20): \$15,000 to \$24,000
- Benches (10): \$8,000 to \$12,000
- Trash Receptacles
- Bus Shelters
- Public art, street art, murals
- Seasonal lighting
- Directional signage

More accurate estimates and a comprehensive list of recommended improvements would be completed with the master plan.

PARK REPAIRS AND PREVENTATIVE MAINTENANCE

Department: Parks and Recreation

Activities: Construction

Strategic Plan Objective: Well-governed and Complete Community

First Year Capital Budget Amount: \$254,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

Project Overview: The "Park Repairs" and Preventative Maintenance projects and equipment group addresses essential maintenance and improvements at various parks and outdoor spaces maintained by the Department of Parks and Recreation. These projects focus on enhancing the safety, accessibility, and functionality of park amenities, ensuring that these spaces continue to serve the community effectively and sustainably. Recognizing the dynamic needs of our parks and outdoor spaces, the scope and specifics of these projects may be adjusted to accommodate evolving priorities or unexpected challenges. This flexibility allows the Department of Parks and Recreation to respond effectively to the community's needs and ensure the ongoing quality and sustainability of our park facilities.

List of Projects:

- **Southside Park Stream Valley Trail & Stream Crossing - \$60,000**

Southside Park is undergoing a restoration of Bear Branch Stream, and as part of the improvements, an asphalt trail will be added that will follow the stream bank. This new connection will link the Walker Drive entrance into the park to Cottage Street, enhancing walkability and providing safer, more convenient access through the park. There is currently a dirt path located from the Walker Drive entrance to the playground.

- **Glyndon Park – replace Baseball Fence at Cervenak Field - \$45,000**

Replace the baseball field perimeter fence and backstop fence to maintain the quality of the athletic facilities and reduce ongoing repair and maintenance costs from recurring issues. Additional mid-rails will be installed on a portion of the fence to enhance durability and minimize warping in high-impact areas.

- **Wildwood Park asphalt trail repairs - \$30,000**

There are multiple trails areas with cracked pavement, heaving caused by tree roots and erosion along trail edges that need to be supported by additional gravel. Seal cracks to aid the longevity of the asphalt.

- **East Creek Stream Valley Park bridge structural analysis and repair - \$35,000**

Complete a structural analysis of the bridge to evaluate the load carrying capacity due to floor beam deterioration, as identified in the Pedestrian Bridge Inspection report completed in 2024. Make recommended repairs (if any) to the bridge after the structural analysis is complete.

- **Replacement of Tennis Backboard at Meadow Lane Park - \$12,000**

Replacing the worn tennis backboard to support continued recreational use and enhance the experience for tennis players.

PARK REPAIRS AND PREVENTATIVE MAINTENANCE

- **Install Automatic Door Locks to Park Bathrooms - \$15,000**

Installing automatic door locks to improve security and accessibility of park restroom facilities, ensuring they are available during designated hours. Locations include Southside, Meadow Lane, Town Green, and Glyndon Park.

- **Storm Water Improvements to Meadow Lane Park - \$35,000**

Implementing stormwater management solutions to address drainage issues and protect park infrastructure from water-related damage.

- **Ride on leaf blower - \$10,000**

Purchase a ride on leaf blower to expedite leaf blowing work and to make leaf blowing more efficient. Will also be used for park trail and parking lot blowing and improving aesthetics at the parks.

- **Water tank and spray rig assembly - \$12,000**

Purchase an additional water tank and spray rig to address the increase in watering expectations and to aid the departmental approach of hiring seasonal staff to perform watering. The current watering tank is on a trailer, which all seasonal staff have little to no experience driving and backing up trailers. The spray tank and assembly will be placed in the back of a truck to eliminate the need for a trailer.

MASHIE DRIVE SE CURB, GUTTER, AND SIDEWALKS (HINE STREET SE TO ECHOLS STREET SE)

Department: Public Works

Activities: Construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$2,700,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

This project will eliminate the existing drainage ditches along both sides of the roadway and install approximately 1,900 feet of new curb, gutter, drainage infrastructure, and sidewalk. This project will also include sidewalk improvements along the frontage of 203 and 205 Mashie Dr. to provide a pedestrian connection that extends from Mashie Dr to Maple Ave, which would otherwise be a missing link of sidewalk.

Financing for this project is through anticipated NVTA and VDOT grants. If the VDOT TA funds are approved, then design may begin in FY 2027, and the Town will utilize approved NVTA 30 local funding for the match requirement.

STORMWATER LOCAL ASSISTANCE FUND (SLAF) STREAM RESTORATION PROJECTS

Department: Public Works

Activities: Planning/design, and construction

Strategic Plan Objective: Environmentally sustainable community

First Year Capital Budget Amount: \$1,600,000

Total Future Capital Budget Requests: \$6,400,000 FY30 – 36

DESCRIPTION:

The Town of Vienna’s stream restoration program currently includes both approved and planned projects to stabilize the steep and eroded stream banks along Bear Branch and Hunters Branch. The projects will reduce sedimentation and provide water quality benefits from reduced sediment transport and enhance aquatic and riparian habitats using natural channel design techniques. Additionally, projects also protect any adjacent property owners from erosion and instability of the stream banks. This program is part of a broader regional effort to support watershed health and comply with state Municipal Separate Storm Sewer System (MS4) permit requirements.

The Town of Vienna’s stream restoration program is funded by anticipated DEQ Stormwater Local Assistance Fund (SLAF) Grants and if approved, a 50% match from Fairfax County Stormwater Tax revenue.

The following projects are included in this program. A map of each project is provided below:

Project	Status	Stream Restoration	Planned Fiscal Year	Budget (\$M)
Bear Branch Phase 1	In Construction	1,900 feet	FY24-25	\$2,000
Bear Branch Phase 2	In Design	2,300 feet	FY26-27	\$2,100

STREAM RESTORATION PROJECTS**

AYR HILL SIDEWALK AND RECONSTRUCTION (LAWYERS RD NW TO DOMINION DR NE)

Department: Public Works

Activities: Planning/design and construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$1,350,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

Ayr Hill Avenue NW from Lawyers Rd to Dominion Dr has a narrow roadway profile with stormwater drainage ditches and aging, narrow sidewalk on one side of the street that is not ADA compliant. Furthermore, the roadway is low lying with steep grading leading to adjacent residential properties and a church, creating additional ADA compliance issues.

This project will correct deficiencies along the 475-foot roadway and replace the existing ditch system with curb, gutter, and stormwater sewer. Additionally, the project will correct ADA compliance deficiencies for existing three-foot-wide sidewalk on the south side of the street. The project will also provide ADA access to the adjacent church (Vienna Assembly of God) and to Center St northbound with a switchback ramp. Currently, there are stairs along the sidewalk on the NW corner of the Ayr Hill Ave and Center St intersection due to the grades.

ADA compliant sidewalk will provide a safe route for pedestrians walking to the businesses on Mill Street and Dominion Road, in addition to providing access to the regional trail and the historic Vienna Train Station.

Financing for the project is being requested through VDOT grant applications that will cover 80% of the cost and NVTA 30 funding will be utilized for the remaining local cost. If the VDOT and NVTA Funds are approved, design may begin in FY 2027 with construction in FY 2029.

LOCUST ST SW TRAIL IMPROVEMENTS

Department: Public Works

Activities: Construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$1,025,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

This project will demolish and reconstruct the existing asphalt trail extending from the Center Street S/Locust St SW intersection to the W&OD Trail (approximately 700 Feet). The project will widen both the trail and existing sidewalk along the school parking lot to 10 feet and re-categorized the path as a standard Shared-Use Path (SUP). In addition, the project will include grading and drainage infrastructure improvements because water ponds over the existing path after rainfall in this low lying area.

The grants have been approved and Town Council approved the design contract in March of 2025. Construction is anticipated to begin in the second half of 2027 upon completion of the design.

MAPLE AVE AND JAMES MADISON DR SIGNAL

Department: Public Works

Activities: Planning/design and construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$700,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

This project proposes to reevaluate the existing signal at the intersection (HAWK Signal – High-Intensity Activated Crosswalk). Although it is anticipated to improve when the new traffic signals along Maple Ave are completed, the intersection of Maple Ave. and Nutley St. currently backs-up all the way to James Madison Dr. Additionally, James Madison High School and shopping center traffic causes congestion at this intersection, resulting in substantial cut through traffic in local neighborhoods because buses and cars cannot make a protected left turns. Therefore, DPW would like to explore the potential for a traffic signal at this intersection to improve conditions for the high school, shopping centers, and local neighborhoods.

A Signal Justification Report (SJR) will be first completed to determine if a signal is warranted and which signal design is applicable. If an alternative design is applicable, such as a standard traffic signal, then this design will be completed along with construction.

The SJR study and applicable design is anticipated to cost an additional \$200,000, and if warranted, the estimated construction cost is \$700,000. The project is proposed for NVTA 30% local funding.

LAWYERS RD NW AND CHURCH ST NW - RECONFIGURATION

Department: Public Works

Activities: Construction

Strategic Plan Objective: Safe and efficiently mobile community

First Year Capital Budget Amount: \$400,000

Total Future Capital Budget Requests: N/A

DESCRIPTION:

This project proposes a redesign of the Lawyers Rd NW and Church St NW intersection.

Based on a recommended improvement from the Maple Ave Multimodal Study completed in 2020, DPW plans to complete the reconfiguration of the intersection of Church St NW and Lawyers Rd NW to improve the traffic flow and improve pedestrian safety. The project will reconfigure the existing single intersection into two smaller intersections. The reconfiguration also provides a more familiar intersection style which will help with traffic flow and safety.

The anticipated construction cost is \$400,000 due to complexity of the project/location and Maintenance of Traffic that will be required.
