

**RESOLUTION NO. \_\_\_\_\_**  
**A RESOLUTION of The Town of Vienna**  
designating **Vienna, Virginia** as a BEE CITY USA® affiliate.

WHEREAS, the mission of BEE CITY USA is to galvanize communities to sustain pollinators, responsible for the reproduction of almost 90% of the world's flowering plant species, by providing them with healthy habitat, rich in a variety of native plants and free to nearly free of pesticides; and

WHEREAS, thanks to the more than 3,600 species of native bees in the United States, along with introduced honey bees, we have very diverse dietary choices rich in fruits, nuts, and vegetables; and

WHEREAS, bees and other pollinators have experienced population declines due to a combination of habitat loss, poor nutrition, pesticides (including insecticides, fungicides, and herbicides), parasites, diseases, and climate change; and

WHEREAS, pollinator-friendly communities can benefit local and regional economies through healthier ecosystems, increased vegetable and fruit crop yields, and increased demand for pollinator-friendly plant materials from local growers; and

WHEREAS, ideal pollinator-friendly habitat:

- Provides diverse and abundant nectar and pollen from plants blooming in succession throughout the growing season;
- Provides undisturbed spaces (leaf and brush piles, unmown fields or field margins, fallen trees and other dead wood) for nesting and overwintering for wild pollinators;
- Provides water for drinking, nest-building, and butterfly puddling;
- Is free to nearly free of pesticides, as many pesticides can harm pollinators and/or their habitat;
- Is comprised of mostly native wildflowers, grasses, vines, shrubs, and trees, since many wild pollinators prefer or depend on the native plants with which they co-adapted;
- Provides connectivity between habitat areas to support pollinator movement and resilience; and

WHEREAS, Integrated Pest Management (IPM) is a long-term approach to maintaining healthy landscapes and facilities that minimizes risks to people and the environment by: identifying and removing the causes of pest problems rather than only attacking the symptoms (the pests); employing pests' natural enemies along with cultural, mechanical, and physical controls when prevention is not enough; and using pesticides only when no other method is feasible or effective; and

WHEREAS, supporting pollinators fosters broad-based community engagement in environmental awareness and sustainability; and

WHEREAS, **Town of Vienna** should be certified a *BEE CITY USA* community because:

**The Town of Vienna has:**

- **Multiple pollinator gardens around town with more planned;**
- **A native tree re-planting requirement for new home builders;**
- **Bi-annual native plant sale, town event;**
