

Affordable Security

For most construction projects, secure perimeter fencing is a legal necessity. A post-driven temporary chain link fence from National Construction Rentals is a reliable and **cost-effective solution** that ensures your construction site is well-protected, limits liability, and improves the overall aesthetics of your job site.

Chain link fencing can be installed in a variety of surfaces including sand, soil, asphalt and concrete. National's chain link fencing complies with ASTM A392-06 standards, having superior exposure and corrosion resistance. Installed by our qualified professionals, this fence configuration is **extremely durable** and perfect for new construction, home developments, public works projects and after a disaster strikes. It's the preferred choice of many in the construction industry.
