Subject: Leaf Machine

Katrina,

In the notes I mention the single axle leaf machines being sold. They were sold in 2015, before that there were six machines, now there are only five.

Leaf Machine with delivery and NJPA discount is:	\$ 29,538.60
Option - RAS.100 Rotary self-cleaning radiator screen	\$ 1,524.40
Option - LCT620.602.U Urethane coated liners for blower housing	\$ 904.65
Option - SDH.16.120 Urethane suction hose in lieu of rubber	\$ (323.75)
Total Cost	\$31,643.90

Note1: Please check my figures, I came up with three different ones and this one twice so went with it!

Note2: The salesman in his email states the options already include the NJPA discount.

I emailed the salesman asking about ETA once he has a PO. He says 60 days so it can wait since leaf season is over and we won't be using the machine until next fall.
