

Public Engagement Narrative

This is the second round of the Vienna Market Project with a new smaller scale design that has taken into consideration the questions and concerns that were brought to light from the community and Town Councils. With this new smaller scale design and additional parking for guests I believe we have created a project that will enhance the Town of Vienna and create a wonderful addition to the downtown corridor. Throughout the rezoning process we will be doing a few things to create an alliance with the Vienna community to keep them informed as to the progress of the project.

1.) As mentioned above in this design we took all of the questions that we accumulated during the first go around and tried to address all of the concerns and create a project more in line with those concerns.

2.) We will be going live with a landing page and a Website to present the Vienna Market Project to the neighbors and citizens of Vienna with a survey to engage the community and address their questions and concerns.

3.) Throughout the rezoning process we will personally meet with the available adjacent neighbors to present the new project and address their questions and concerns about how this new project will directly impact them.
