

## Nickel Gap Siding

Nickel Gap Siding is the newest addition to the TruExterior® Siding Craftsman Collection™. The tongue-and-groove profile is self-gapping, creating a consistent nickel sized space between each board, allowing installers to achieve the traditional look of perfectly-spaced shiplap siding quickly and easily, without the need for spacers.

## TruExterior® Siding

Boral has created an entirely new category of siding products with its TruExterior® Siding. The six new Craftsman Collection™ profiles recreate the look and feel of traditional wood siding but perform better, are remarkably workable and have a lasting look – offering a solution for homeowners who desire the look and feel of traditional wood siding without the constant maintenance and upkeep associated with exterior wood products.
