Version 1.0

# Menu Design & Content: Clarity & Flexibility

## Our New Menus Are:

- An ordering device to help confirm orders
- Smaller & Streamlined menus, simplified for our Customers
- Static/Limited Motion - can be controlled by Restaurant
- Cleaner visuals, easier to read products, price and items
- Still change throughout the day to support our menus (just like our old print menus)

## Our New Menus Are NOT:

- **Not** an advertising channel or billboard
- **Not** full video or motion to distract drivers or slow down our drive thru
- **Not** flashy, bright images or colors (ie. Vegas-style)
- **No** additional sound or speakers

## Menu Board Flexibility (if desired or requested)

- Turn on and off their menus
- Stop movement or motion
- Manually control/pre-set brightness or set automatically to adjust brightness based upon daylight

# Any message, any weather, any environment.

## OHF Series Outdoor Signage

Even on the brightest, hottest days of summer and the rainiest, snowiest days of winter, your message will come through clear and bright. The Samsung OHF Series outdoor signage solution is a completely integrated, self-contained ultra-slim display with an embedded power box, housed in an impact-resistant enclosure and thermally protected by a patent-pending steady cooling system. With technologies and design features that deliver reliable 24/7 performance, they're ideal for impactful information delivery. No matter where you want to deliver it.

## Key Features

### A Complete, All-in-One Outdoor Signage Solution

The OHF Series features an ultra-slim 85mm Samsung panel with embedded power box housed in a thin, durable and impact-resistant enclosure that's built to withstand harsh weather and vandalism. All that's required is a simple metal enclosure or optional stand.

### High Visibility and Brightness Make Messages Easy to See

High 2,500-nit brightness, an auto brightness sensor that optimizes brightness, and 5,000:1 contrast ratio (3,000:1 for 85" display) work together to deliver easily seen messages even in direct sunlight. Innovative anti-reflective Magic Glass helps cut glare, and Samsung's circular polarizing technology allows content to be easily viewed even while wearing polarized sunglasses.

### Reliable in the Harshest Environments, 24/7

Samsung OHF Series displays employ a patent-pending steady cooling system with heat exchanger that allows them to withstand extreme temperatures of -22° F to 122° F without requiring a supplemental heating or cooling system. They're also IP56-certified, to withstand wind-driven dust, hose-driven water, rain, sleet, snow and corrosion.

### Designed for Durability

For greater peace of mind, the OHF Series is built to withstand abuse. The 5mm (0.19") tempered Magic Glass features IK10-certified durability.<sup>1</sup> In addition, a gap between the Magic Glass and the LCD panel is designed to protect the panel from impacts to the Magic Glass.

### Easy Content Management

The easy-to-integrate content management platform features an integrated SoC media player, HDBase-T connection, Samsung's cloud-based 4th Generation Smart Signage Platform, and MagicInfo Solutions.

### Lower Total Cost of Ownership (TCO)

With an embedded network hub and Wi-Fi functionality, there's no need to purchase a router when linking displays. The filter-less advanced cooling system is easy to manage, and the reliable housing means you don't have to worry about damage from heat, cold or water.

## Lumen output

Fig 1.0

The attached is the max potential light output of the screen (see accompanying IES file)

The units have inbuilt ambient light sensors

These light sensors dim the brightness of the screen based on the light surrounding it

The screens can dim from full brightness 2500nit ( Fig1.) all the way down to 500nit to prevent excessive output (glare) in low light and night time environments
