

**INVITATION FOR BID SUMMARY REPORT
AND AWARD**

Date: September 4, 2019

Bid Number and Title: IFB 20-08 Construction & Demolition Debris Disposal

Bid Opening Date and Time: August 14, 2019 at 11:00 AM

Bids Opened by: Gina Gilpin, Purchasing Agent

Witnessed by: David Donahue

Total Bids Received: Three (3)

Bids were received from three (3) vendors for the subject IFB. See the detailed Bid Tabulation, attached.

While the total low bidder appears to be Waste Management of Virginia, their bid price per ton of \$72 is much greater than the \$55 per ton price of the second lowest bidder, Broad Run Recycling. The discrepancy is due to the fact that a calculation involving the distance from Northside was taken into account on the bid form. The apparent low bidder is also not able to accommodate the needs of the Town on a regular basis, as they can only accept a limited amount of construction debris at one time, while the second lowest bidder has no limits to the amount of materials they can accept, daily.

The Deputy Director of Public Works, David Donahue, has provided a full written justification, attached, for making the primary award of the contract to Broad Run Recycling, and a secondary award to Waste Management of Virginia.

Award is therefore recommended to be made to:

Primary

Broad Run Recycling, LLC
9220 Developers Drive
Manassas, VA 20109

Secondary

Waste Management of VA, Inc.
2801 Dorr Ave.
Fairfax, VA 22031

Subject: Construction Debris Contract
Date: Wednesday, September 4, 2019 10:36:34 AM

Gina, below is my award recommendation for the construction debris contract:

Our construction debris hauling operations work most efficiently when we are able to haul large amounts of construction debris in a single day or two. This allows us to take advantage of staff and equipment when we are unable to perform normal operations. This could be the result of equipment breakdown or rainy weather. During normal operations, we stockpile construction debris at Northside and haul to our disposal site when we have equipment and staff available. In discussions with Waste Management, we found out that they can only accept limited amounts of construction debris at any one time. Broad Run has no limits on the amount of material they accept daily.

The bid price of \$72 per ton by Waste Management vs the bid price of \$55 per ton by Broad Run would result in a \$34,000 extra charge based on a volume of 2,000 CY per year. Waste Management is located approximately 5 miles from Northside Yard while Broad Run is located approximately 26 miles from Northside Yard. This difference in mileage represents about \$13,000 more in equipment operating cost to deliver 2,000 tons to Broad Run. But still results in a net savings of about \$20,000. While it is less costly to haul to Broad Run, there are times that it would benefit the Town to have a site located closer by. This would allow us the operational flexibility to take advantage of times when we have limited staff and equipment to haul. For instance, we could haul directly to Waste Management and have equipment back to the job site for another load within an hour.

Our previous contract was with Broad Run, at a unit price of \$47.50 but we cancelled and rebid because the requested price increase to \$55 ton was greater than the CPI-U of 1.6% allowed under the contract. The lowest bid price is now \$55 ton. Therefore, I recommend award of the contract to Broad Run with a secondary award to Waste Management.

Broad Run, 1500 tons x \$55 ton = \$82,500
Waste Management, 500 tons x \$72 ton = \$36,000

Thanks.

Dave
