Why Dryvit?

DS273

Belmont University | Nashville, TN

Why Dryvit?

No compromises! With Dryvit you get the best value, which makes your projects go smoothly and profitably. Dryvit delivers the best value, the best product and the very best support.

Best Value

Let's be honest, getting a good price on product is important, but getting the best value is more important. Value isn't defined by price alone. It is a combination of support, product, availability, and price. Having a job go sideways is extremely costly. Team Dryvit works hard to keep you competitive with the most knowledgeable and local support in the industry. You can buy a cheaper product, but you can't get a better value than Dryvit.

Best Product

Dryvit finishes are easier and faster to spread, resulting in reduced labor costs and fewer call backs for you. The coverage rate of these finishes is also higher than competitive products, resulting in a lower per square foot cost.

- Look for yourself – compare the product data sheets.
- Still not convinced? Take the wet wall challenge to do a side-by-side comparison to see for yourself why Dryvit products are preferred by contractors and end users.

Innovative specialty finishes allow you to capture more square feet of the project that previously went to other trades.

Industry-Leading Warranties

- Warranty includes 100% value of labor and materials to replace Dryvit products and wall assembly if damaged.

Private Residence | Cumberland, RI

- Lifetime warranty against rust.
- Option of 20-year warranty against impact damage.
- Option of 30-year residential warranty.
- Option of lifetime renewable Platinum warranty.

ISO 9001 certification assures consistent product quality and ISO 14001 assures you have partnered with an environmentally responsible company.

Best Support for Contractors

Dryvit provides:

- Comprehensive group of Field Service Managers experienced in the plaster trade that are strategically located throughout the US.
- Best local distributors in the industry.
- Free plan & detail reviews.
- Assistance with and participation in pre-construction meetings.
- Free product application training.
- Application videos – 24/7 resource.
- Toll-free number with dedicated customer service personnel.
- Live chat on website for instant answers to your questions.

VENTANA

Euro Series Doors
Authentic European Design, Made in America

Swing Door with Tilt/Turn Sidelite

VENTANA

Single Swing, Swing with Tilt/Turn Sidelite and French Doors

Making an entrance when first impressions count. There's no better way to make a positive statement and secure your home against weather and intruders than with one of our residential or commercial swing doors.

Whether you want to add visual impact or simply blend in with the style of the building, a Single Swing or French door will exceed your expectations. Designed to have exceptional style, durability, weather resistance and security features, they can transform any room.

The Swing door with Tilt/Turn Sidelite combines the benefits of a swing door with our tilt/turn window. The tilt/turn sidelite provides enhanced ventilation and includes a fixed screen, while the swing door provides access.

The drawings shown below illustrate just a sampling of additional possible configurations. Tilt/turn options allow fresh air ventilation and are available for all inswing configurations.

Applications: Entry Doors | Patio Doors | Multi-Family | Residential | Commercial +

Fold/Slide Bi-Fold Doors

Enjoy the outside inside with folding doors. Our Fold/Slide door system offers contemporary style, unique functionality and excellent reliability.

Our Fold/Slide door system provides superior operating performance and smooth integration into any architectural style and space. They are engineered using high quality steel-reinforced PVC profiles with superior hinge and locking systems that are reliable and secure.

These doors are ideal for any space where you want to create grand views or open up your floor plan.

The self-cleaning rollers, along which the doors slide, offer a smooth glide and dependable performance with solid design and expert engineering. Choose from three to six operating panels in various configurations. The drawings shown below illustrate several options.

Applications: Restaurants | Bars | Patios | Sun Rooms | Four Season Rooms +

Lift/Slide Doors

Open up your home and create a seamless transition from inside to outside. Our Lift/Slide door system will give you additional living space while providing protection and security.

A Lift/Slide door will fill a room with light and provide an unobstructed view to the outside. Our PVC door system provides state of the art technology tailored to your specifications. It will become the central design element of any room.

High quality hardware is standard on our Lift/Slide doors. The smooth operating handles are available in brushed nickel satin finish and polished brass or they can be color-matched to the vinyl. By turning the handle a full 180 degrees, the operating panel unlatches and can be easily rolled along its track on stainless steel rollers to provide ventilation or egress.

A two-panel Lift & Slide door up to 20 feet wide can be operated with just 5 pounds of force!

*Applications: Sun Rooms | Patios | Pool House | Offices / Conference Rooms |
Four Seasons Room | Anywhere you wish to replace a wall with glass!*

Komfort Slide and Tilt/Slide Doors

American craftsmanship and European engineering combine to create two unique sliding door options.

The Komfort Slide door is a variation of a sliding door. It's unique hardware and ventilation systems are what set it apart.

The innovative soft close mechanism automatically moves the sash to its closed position. Its intelligent stay system allows this door to open and close the sash smoothly and quietly.

Another unique aspect of the hardware is its all around night ventilation feature. This venting element will keep the room safe even if left open in your absence. The ventilation opening is not visible from the outside. A natural exchange of clean, fresh air provides a more pleasant, healthier environment.

An alternative to the Komfort Slide, the traditional Tilt/Slide Door provides the same smooth operation but replaces the night ventilation feature with a tilt position that mirrors the function of a Tilt/Turn window.

The Advantages

Our European-inspired doors provide a high performance commercial grade system that utilizes all the benefits of PVC while satisfying both commercial and residential structural requirements. With their European engineering, our Euro door systems are among the highest performing units on the market today.

Outstanding Performance

- Provides strength, durability, and worry-free maintenance.
- High-quality gaskets in dual compression seals keep the cold, draft and moisture outside.
- High thermal insulation values lead to cost savings by reducing your energy use.
- Better CRF (Condensation Resistance Factor) than thermal broke aluminum. Vinyl is 77-81, aluminum is 30-60.
- Glass packages range from .25" monolithic to 1.5" triple pane. The standard 1" IG with Low-E/Argon meets 2015 ENERGY STAR® requirements in all zones.

Reliability You Can Count On

- Galvanized steel-reinforced frame and sash = 3x stronger than aluminum which helps to qualify these products for use in commercial applications. It also allows fabrication of much larger than typical sizes.
- Multiple chamber profile designs provide exceptional insulation and sound abatement.

Worry-Free Maintenance

- Vinyl is low maintenance.
- Vinyl provides improved moisture resistance over other frame materials, reducing the risk of mold.
- Vinyl, in combination with its multi-chamber design, creates a positive insulating factor, whereas aluminum and steel are conductors.
- Interior dry glazed system allows easy glass replacement from the inside.

Security You Can Trust

- In order to meet the requirements of any project or remodeling application, the hardware for Tilt/Turn doors can be designed for different safety and security levels.
- Multi-point locking hardware on all four members of the frame and sash provides security and vandalism deterrence that meets a grade 10 resistance factor.

Enhance Your Natural Lighting

- Euro Tilt/Turn doors can be manufactured in larger sizes, enhancing daylight effect.
- Larger openings are visually pleasing.
- Natural light is a key feature in good architectural design.

Eco-Conscious Engineering

- Vinyl has a smaller carbon footprint than wood and 20x smaller than aluminum.
- Vinyl requires less energy to manufacture than other alternatives for frames and sashes.
- Ideal for LEED building design meeting the 2030 energy effort.
- ENERGY STAR® qualified.

Unleash Your Creativity

- Architectural shapes can be provided for most door systems.
- Doors can be manufactured with different interior and exterior finishes.
- Available in extruded white, beige or clay.
- Vinyl can be painted for unlimited color selections. Our solvent-based paint system forms a bond to the vinyl that prevents cracking and peeling.
- Woodgrain laminates give the appearance of rich wood without the maintenance factor and are available for both interior and exterior options.
- A variety of designs and finishes for handles are available.
- Optional Genius Retractable Screens are available for all our door products.

Unlimited Color Selections
