Subject:

Intent to adopt FY 2019-20 Water and Sewer Rates

EXPLANATION AND SUMMARY :

A Water and Sewer Rate Study was performed in FY 2017-18 and adopted by Council. The study proposes rate changes over a five-year period to ensure that financial objectives of the fund are achieved.

During the past fiscal year, we reviewed actual water and sewer consumption patterns by rate tier to ensure that budgeted rates for the second year of the study period were adequate; as a result, we made slight adjustments to sewer rates. Water rates are proposed to increase 3.9 percent, and sewer rates are proposed to increase 10.5 percent based on FY 2018-19 actual billed experience by rate tier. Fixed service charges are proposed to increase from \$17.75 to \$23, or 29.6 percent, per quarter for residential customers. This increase is necessary to the Town's efforts to bring the total percent of fixed charges in line with industry standards. Commercial customer fixed charges also are proposed to increase by 29.6 percent based on meter size.

Overall, the average residential customer's bill is proposed to increase by \$16.20 per quarter, or \$64.80 annually, an increase of 10.0 percent.

Water availability and meter purchase fees are proposed to increase by 2.5 and 3.5 percent, respectively, to match fees charged by Fairfax County. Increase percentages are minimal and will have a small positive impact on revenue.

Consumption charges proposed for FY 2019-20 are as follows:

Water Consumption Charge	0 - 9,000 gallons \$5.30 per 1000 gallons
