Subject:

Intent to Adopt FY 2022-23 Water and Sewer Rates

EXPLANATION AND SUMMARY :

Town water and sewer rates for consumption and service charges are based on results of a rate study conducted in FY 2017-18, which laid out a plan for five years to ensure the fund had adequate operating reserves and through which Council committed to increase investment in infrastructure for the good of the Town and its customers.

During the past fiscal year, the Town reviewed actual water and sewer consumption patterns by rate tier to ensure that budgeted rates for the last year of the study period provided an adequate cash reserve for the fund. As a result, the Town made slight adjustments to both water and sewer rates. Water rates are proposed to increase 2.6 percent, and sewer rates are proposed to increase by 6.4 percent, both based on actual billed experience by rate tier and costs to purchase wholesale water and sewer treatment. Fixed service charges are proposed to increase from \$31.30 to \$32.80 per quarter for most residential customers, or 4.8 percent. This increase is necessary to bring the total percent of fixed charges in line with industry standards. Commercial customer fixed charges are proposed to increase by 10 percent based on meter size.

Overall, the average residential customer's bill is proposed to increase by \$10 per quarter, or \$40 annually, an increase of 4.8 percent.

Water availability and meter purchase fees are proposed to increase by 2 to 3 percent, to match fees charged by Fairfax County. Increase percentages are minimal and will have a small positive impact on revenue.

Consumption charges proposed for FY 2022-23 are as follows:

RESIDENTIAL CONSUMPTION	Block Rate
Water 0 - 9,000 gallons	\$5.85 per 1,000 gallons
Water 9,001 - 18,000 gallons	\$6.35 per 1,000 gallons
